2022 Indian Chieftain Classic by Brian Klock

ON THE COVER

The 2022 Indian Catalog Bike is a 2014 Indian Chieftain Classic customized by Brian Klock of Klock Werks motorcycles located in Mitchell, South Dakota.

"Indian is a brand that has a lot of romance, a lot of history with Indian winning some crazy race or being ridden by someone famous, it is a powerful brand," Klock said. The bike showcases a favorite custom bike style. "I love the Vicla style of motorcycles, the custom culture style that focuses on big wheels and the pride they show in their bikes," Klock said. He had built another American V-Twin bike in this style, but … "my wife Vanessa loved it and took ownership of it," Klock said. "Needless to say I needed another."

He decided the next build would be based on an Indian, and went in search of a 2014 Springfield Blue Chieftain Classic. "This is a one-year color scheme and the first year of the Indian launch under Polaris ownership, the bike is a very special find and a big deal for me."

Bike secured, Klock sent the sheet metal out for a stunning paint job by Pete "Hot Dog" Finlan. "He

painted many of the West Coast Choppers back in the Long Beach days and is a PPG Refinish certified expert," Klock said. "I let him have free reign with the colors aside from keeping the Springfield Blue base color." The name of the bike is "Hinto," which is blue in Sioux Indian culture.

The engine heads and cylinders have a custom diamond-cut finish, complemented with chrome accessories to really make it "pop" with the new paint.

The front end and rear end have a custom air ride suspension system crafted by VicBaggers. The front wheel was switched out from the stock size for a custom-laced 21" rim wrapped with Klock Werks' own Klassic Front Fender.

The handlebars are Klock Werks KlipHangers, the solo seat is from Mustang. The leather "tool roll" was handcrafted by friend Tony Sportelli specifically for the bike. "The blanket was a truck stop find somewhere in my travel," Klock said.

The bike rides smooth and straight. "It is a dream ride. My team loves it." Klock said. "And it just gives an "attitude" feeling when you ride it."

"I am honored to be a long-time partner with Drag Specialties," Klock said. "And it is only fitting that our second cover bike ever for Drag Specialties is the team color of blue!"

Many thanks to Brian and the Klock Werks team for sharing this beautiful custom bike.

KLOCK Werks FLARE WINDSHIELD

FLARE™ WINDSHIELDS

- Manufactured from dual-side, hard-coated polycarbonate material for outstanding impact strength
- Innovative design features "hips" at the outer edge of the shield that re-route the air to add downforce and aid stability
- Installs easily using stock mounting hardware, maintains stock adjustability
- FLARE at the top sends clean, less turbulent air to rider and passenger
- Choose from clear, tint, dark smoke or black color options

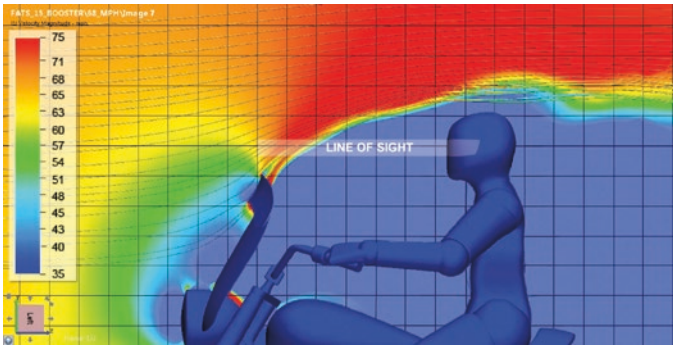
SIDE WINGS

- Expand comfort pocket, channeling air outward while "cleaning" the flow
- Adjust to suit rider preference
- Can be installed/removed with windshield intact – Santoprene pads grip the windshield but do not mar the surface
- "Ghost" shade – a neutral tint with 85% light transmission; barely noticeable, with just enough tint to make the edges disappear
- Side Wings fit all Memphis Fats windshields or similar windshields that measure either 3 mm or 4,5 mm thick (includes inserts for both sizes); feature injection-molded glass-filled nylon clamps in place of the billet aluminum; can be mounted along with Hot Wing

PART #	DESCRIPTION
2350-0200	Side Wings



HOT WING

- Boost airstream upward – Venturi action speeds up the airstream while smoothing the flow – without buffeting
- Allows the use of a shorter shield; now you can easily look over your shield
- Made with "Ghost" shade – a neutral tint with 85% light transmission; barely noticeable, with just enough tint to make the edges disappear
- Uses lightweight, economical injection-molded glass-filled nylon clamps; fits Memphis Fats windshields or similar windshields that measure 3 mm or 4,5 mm thick (includes inserts for both sizes)

MEMPHIS SHADES BATWING FAIRING

- Features clean aerodynamic shape
- Inner fairing structure is black ABS
- Fairing outer shell is opaque black Lucite® with a class A finish that looks great as is, or can easily be painted
- Memphis Shades exclusive No-Tool Trigger-Lock mounting kits feature a detach system that allows you to quickly and easily remove or install your fairing, or swap out with other Memphis Shades windshields, sportshields or fairings
- Trigger-Lock kits are available in a combination of CNC-machined aluminum plates, stainless steel bolts and aluminum anchors or black E-coated plates, bolts and anchors for a clean appearance that's built to last
- Fairing is predrilled and fitted with push-out hole plugs for easy wind deflector installation
- Windshields are available in four heights and gradient black, as well as clear and solar (a light tint with 72% visible light transmission) for Spoiler windshields; see below
- Optional wind deflectors for increased downward airflow, windshield tri-pouch for storage and fairing trim for style are also available; see page 18

NOTE: Batwing Fairing is not compatible with any other fairing windshields, wind deflectors or accessories.

NOTE: Plate-only kits are for riders who already have a Memphis Shades Trigger-Lock windshield installed and do not need the anchoring hardware components.

TOUR TRUNK RACKS

- Generous 51 cm x 32 cm (20" x 12½") luggage rack easily accommodates the largest luggage bags and comes with custom tapered mounting spacers which allows the rack to more easily conform to the curve of the trunk
- The tapered spacers are recessed to allow the rack to rest securely into the spacers which helps spread the load over the trunk lid to alleviate stress cracking
- Rubber washers under each spacer not only protect the bike's finish, but also assure a watertight fit
- The manufacturer's trunk specs should be viewed for loading limits
- Designed specifically for the Indian trunk, its mounting legs align with the OEM mounting points making it easy to upgrade if you already have an OEM rack installed

GELCORE TECHNOLOGY

DOMINATOR SOLO SEAT

- Combines GelCore™ interior, progressive-density foam and a Gel Channel™-design cover to provide riders with unparalleled comfort, control and modern style
- Seats using Saddlemen's Gel Channel (GC) technology have a center channel that relieves seating pressure on the perineal area, increasing blood flow, thus keeping the rider comfortable in the saddle for longer time
- In addition to pressure relief, the GC-style center of the seat provides an airflow passage
- The rugged carbon fiber weave and smooth vinyl cover holds up to hard use and still retains its good looks
- Using a very large gel pad for additional foam support and vibration damping, this GC-style seat offers the comfort levels normally found in larger touring seats
- Marine-grade fiberglass pans and chrome brackets make sure the seat is durable for decades of riding
- Easy to install; some seats and pillion pads include additional mounting hardware as needed
- The matching optional driver's backrest installs in seconds without using tools and can be adjusted both horizontally and vertically to the rider's back and is removable for a sleek appearance

REKLUSE clutch rEvolution

All Rekluse clutch products are precision-engineered and made of high-quality materials to provide the best in performance and durability. Their components are stronger, lighter, longer-lasting and built for maximum performance. Rekluse's industry-leading auto clutches are optimized for each bike model as it comes from the factory and they've designed each clutch to be fine-tuned for every rider. Rekluse's manual clutches deliver unprecedented performance, tuning and durability with a design that provides more disks in less space, allowing up to four additional friction disks over stock.

1130-0584

1130-0315

RADIUSX CLUTCH KITS

- With RadiusX a high-performance auto clutch is just a clutch pack swap away
- RadiusX combines TorqDrive friction disc technology with Rekluse's innovative EXP (auto clutch) disc
- TorqDrive provides more clutch discs in less space, delivering high-performance auto function within the framework of the stock clutch
- The RadiusX clutch prevents engine stalls so you can focus on the ride and let the auto clutch do the rest
- RadiusX delivers increased power transfer over OEM and longer clutch life with less adjustment over time
- Standard clutch lever function is retained and full override
- Some configurations include Rekluse basket sleeves to prolong basket life

PART #	DESCRIPTION

LITHIUM LIFEPO4 BATTERIES

- Innovative lithium-ion motorcycle and powersport batteries
- Designed for the most demanding riders looking for higher performance, safer performance, faster acceleration, reduced weight and a much longer battery life
- Very low self-discharge provide the possibility to start an engine after a very long period of storage; even in very cold temperature conditions
- Robust brass terminals for enhanced electrical performance
- Super fast charging capabilities
- Multi-position mounting (up to 180°)
- Very safe and environmental friendly
- Up to 70% lighter than lead acid batteries
- Waterproof design
- Heat temperature resistance up to 230 °C
- Ready to use; no need for preparation, just plug and play

BRAIDED HIGH EFFICIENCY CLUTCH CABLES

- The Industry's highest-quality braid available in two color choices to complement your bike; Sterling Chromite® and Black Pearl braided with real black wire braid
- Braid color and weave match on all Magnum control cables and brake lines
- Coated with a non-yellowing, crystal-clear outer jacket for exceptional protection against scuffing paint or chrome
- All fittings are polished then chrome or black-chrome plated
- Low-effort, high-efficiency cable design
- All cables are factory lubricated for smooth, consistent, long lasting-operation

VENHILL

FEATHERLIGHT CLUTCH CABLES

- Marine-grade stainless steel inner wire that runs through a PTFE liner
- Reduced friction provides a light action, easing pressure on the hand, especially in stop/start traffic and during long rides
- PTFE lining removes the need for lubrication
- "Bird-cage" process is applied to inner wire, allowing solder to penetrate the weave of the cable and making the bond with the nipple much stronger

HANDLEBAR CABLE KITS, CLUTCH CABLES AND BRAKE LINES

- Take "cable calculation" headaches out of swapping handlebars
- Kit includes the correct length brake/clutch lines to complete a handlebar swap; electrical wire extensions not included
- Stainless braided kit includes clutch line, brake lines, chrome "T" brake line junction, banjo bolts, fittings and copper crush washers
- Black vinyl/stainless kit includes black vinyl clutch line and black stainless brake lines with chrome fittings, banjo bolts and crush washers
- The midnight kit includes stainless steel brake lines and clutch lines covered in a black smoke-tinted coating with pure black fittings throughout; lines appear graphite or carbon fiber in appearance providing that ultra-custom look and the black fittings seamlessly blend with blacked-out controls and covers on the bike
- Individual components for all kits are available as listed

GALFER PERFORMANCE BRAKING SYSTEMS

CUBIQ® BRAKE ROTORS

- Named after the crystal steel molecules, the Cubiq® brake rotor combines state-of-the-art technology with modern design
- Rotor shape promotes uniform brake pad wear - the same contact surface between the pad and disc every revolution generates regular wear
- Less unsprung weight (up to 40% lighter than standard round rotors) reduces gyroscopic effect and improves the manueverability of the motorcycle
- Increased perimeter surface design generates more cooling surface around the rotor for better temperature dissipation
- Available in fixed (solid mount) or floating designs
- Sold each

NOTE: For maximum braking performance and rotor longevity, Galfer recommends using Galfer brake pads with Galfer rotors. See page 154 for Galfer brake pads.

WAVE® BRAKE ROTORS

- Made from 420 high-carbon stainless Tier 1 steel
- Laser cut, never stamped
- Every rotor is individually heat-treated and double-disc parallel ground to assure perfect flatness
- Wave® design allows for lower operating temperatures in extreme use conditions
- Wave design is lighter than the stock round rotor design
- Sold each

NOTE: For maximum braking performance and rotor longevity, Galfer recommends using Galfer brake pads with Galfer rotors. See page 154 for Galfer brake pads.

BRAKE PADS AND SHOES

ORGANIC BRAKE PADS

- The world's #1 selling organic disc brake pads
- EBC Organic brake pads contain Aramid fibers; these are man-made high-performance fibers used widely for their light weight, high strength, abrasion resistance and thermal stability
- Aramid fibers have high strength-to-weight, thermal stability and abrasion resistance to provide advantages over cheaper steel fiber-based products
- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating – the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design has the long life of a sintered pad with the great feel and are more rotor-friendly than the more aggressive sintered pads
- Can be used to replace organic or sintered metal compound pads

DISC BRAKE PADS

STANDARD BRAKE PADS

- Organic pad compound
- Long service life
- Suitable for use with all brake disc types
- Solid brake performance, even in wet conditions

Standard

RQ BRAKE PADS

- Pads have an organic high-performance mix without general type approval
- Characterized by exceptionally good feedback and controllability even at high working temperatures
- In conjunction with their high friction coefficient and extremely low noise emission levels, RQ pads are ideally suited to use in motorsport, scooter racing, carting or carriage driving, indoor trials or in custom brake calipers made by different manufacturers

SV SINTERED METAL BRAKE PADS

- For front brake use ONLY
- Completely metallic sinter pad
- Good performance
- Can be used with nearly any brake disc type
- Should only be used with bikes that were originally equipped with sintered metal brake pads
- Limited race track use; not heat resistant above 400 °C

SV

CRQ HYPER-CARBON BRAKE PADS

- For front brake caliper use ONLY
- Carbon-based racing brake pad
- Greater durability than the SRQ pad
- Low-level pressure required, good friction rate
- Suitable for high-performance sport motorcycle use

CRQ

SH SINTERED METAL BRAKE PADS

- For rear brake use ONLY
- Completely metallic sinter pad
- Good performance
- Can be used with nearly any brake disc type
- Should only be used with bikes that were originally equipped with sintered metal brake pads
- Friction rate is matched to the SV pad

CRQ

SRT SINTERED ROAD/TRACK PADS

- Premium compound pad with state-of-the-art technology for high durability, performance and ideal modulation (feel)
- Completely metallic sinter pad compound
- Provide stable non-fade performance; excellent choice for track days or club racing
- Compatible with nearly all brake disc types

TRQ TRACK RACING QUALITY BRAKE PADS

- Designed for maximum track performance while being street legal; enjoy a full day on the track and ride home on the same bike
- For front brake caliper use ONLY
- Higher, more stable friction coefficient for greater braking performance
- Optimized direct response characteristics
- Innovative sintering process for exceptional thermal resistance
- Low pad and disc wear

NOTE: ABE/TÜV approved unless noted.

NOTE: All brake pad application PART #s shown are STANDARD compound pads unless noted in chart.

NOTE: Some brake pad applications are available in multiple compound types. To see if additional brake pad compound type is available for your application, check your brake pad PART # in the cross-reference charts provided.

Sintered metal

Organic aramid fiber

BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are second-to-none in their stopping abilities and wear characteristics, while still providing excellent reduction in noise and dust
- Organic pads are OEM-type replacement brake pads for 1970s and earlier models
- Organic pads with aramid high-performance fibers are the perfect choice for polished or chromed rotors and billet steel rotors
- Both compounds of Drag Specialties brake pads are asbestos-, nickel- and lead-free

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our Organic pads with aramid high-performance fiber brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

BRAKE PADS

SEMI-METALLIC CARBON (1054)

- Great feel and modulation for OEM brake pad replacement
- Long-lasting brake pad and very little rotor wear
- Good in wet and/or dry conditions
- Overall a very versatile brake pad compound for almost every need
- GG Rated

HH SINTERED (1370/1371)

- For moderately aggressive everyday or sport street riding
- Advanced ceramic composites ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- HH friction-rated compounds deliver excellent feel and modulation
- Great heat recovery and easy on rotor discs
- Developed for aggressive street riding and sport touring, great choice for heavier street bike

HH SINTERED CERAMIC (1375)

- For moderately aggressive everyday and sport street riding
- Ceramic-coated backing plate to assist with temperature management and dissipate heat
- Advanced ceramic composites ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- HH friction-rated compounds deliver excellent feel and modulation
- Capable of handling almost any type of riding you throw at them
- Brake pads do not fade
- Performance street, track days, canyon riding, amateur racing

SINTERED RACING COMPOUND (1375R)

- Designed for the quick temperature changes of Superbike racing from corner to corner
- Fast recovery from long and heavy brake applications in race conditions
- Strong, consistent feel and modulation during the race
- Easy on rotors, no excessive material build up or rotor wear
- HH rated compound with ceramic and carbon sintered fibers
- Race use only, not suitable for street or recreational use
- Tested and used by Moto GP and MotoAmerica athletes

DP BRAKES

THE ORIGINAL SINTERED BRAKES

- DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- Pads have a quick break-in period so you get maximum performance fast
- DP Brakes design and materials ensure consistent hard stops and fade-free performance
- Sintered metal compounds outlast more conventional organic or aramid fiber pads

STANDARD SINTERED METAL BRAKE PADS

- GG friction-rated and made with DP Brakes' proven sintered metal material
- Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Pad compound gives equal performance in wet or dry conditions
- Ideal replacement for street and touring machines where durability is the prime requirement
- No brake fade

SPORT HH+ SUPERSPORT PADS

- Powerful, industry-high HH+ friction rating with no mileage penalty
- High-tech ceramic heat shield eliminates brake fade
- Dust-free compound design
- Quick break-in so you get maximum braking ability fast
- For front wheel use only

XR STAINLESS DOT BRAKE LINE KITS

- XR Stainless DOT brake lines offer a great fit and excellent quality at an economical price
- Manufactured with an enhanced construction for great braking response and durability
- Two color choices: clear-coated stainless steel with chrome fittings or OE-style black coated stainless steel with black chrome fittings
- Available in stock and plus lengths to fit most ABS or non-ABS Scout, Chief ABS and Challenger ABS models
- E-Z Align rotating line fittings for perfect no-kink fitments
- Fittings are highly polished and chrome or black chrome-plated
- Inner PTFE tubing braided with XR Stainless Steel reinforcement embedded in a tough Nylon outer jacket offers exceptional protection for paint or chrome
- Brazed construction eliminates leaks and alignment problems

NOTE: Complete kits contain brake line assemblies to connect the caliper(s) to the master cylinder.

NOTE: All non-ABS kits are complete kits.

NOTE: ABS Upper kits contain a brake line assembly to connect the ABS controller or lower brake line assembly to the master cylinder. A lower brake line assembly is not required.

NOTE: ABS Lower kits are optional and do not require an upper line for installation.

BRAIDED FRONT UPPER ABS BRAKE LINES

- The industry's highest quality braid available in two color choices to complement your bike; Sterling Chromite® and Black Pearl with real black wire braid
- Available in stock and plus lengths for most ABS Chief, Challenger and Scout models
- Inner PTFE tubing braided with aramid fiber greatly reduces line expansion and provides the ultimate in high performance
- E-Z Align rotating line fittings for perfect no-kink fitments
- All fittings are polished and chrome or black chrome-plated
- Braid color and weave match on all Magnum control cables and brake lines
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

NOTE: ABS kits contain either an upper brake line assembly to connect the ABS controller to the master cylinder or a lower brake line assembly to connect the controller to the caliper.

NOTE: ABS lower kits are optional and are not required for upper line installation.

FLO STAINLESS STEEL, REUSABLE "SPIN-ON" OIL FILTER

- Made from laser-cut, medical-grade, 304 stainless steel micronic filter cloth, this filter provides 200% more filter area in many cases
- Stainless filter catches items down to 35 microns, which is about three times better than most good paper or brass filters
- Unlike glued paper filters, the FLO Oil Filter pleat seam is welded and able to withstand up to 600° F
- Filter maintains consistent flow under all conditions including extreme heat, the presence of water, and cold start-ups where paper filters can flow so poorly that they often cause the bypass valve to open and allow unfiltered oil to enter your engine
- Should be the last filter an owner ever needs; this high-tech filter technology is widely used in all types of auto racing including NASCAR, Indy-type cars, Formula 1 and in the aerospace industry where filtration is of the utmost importance
- FLO reference # PCS1

MANUAL OIL BYPASS VALVE

- Acts as a manual thermostat, allowing you to bypass the oil cooling system for cold-weather riding or for faster warm-ups on cool days
- Durable, anodized billet aluminum construction
- Knurled grip knob
- Works with all oil coolers
- Compact in-line installation
- Service kit contains replacement O-rings, snap-ring retaining clip for manual bypass knob and spare decal

NOTE: If oil hoses between the oil cooler and the oil source are too short, the oil cooler bypass valve may not fit in the oil lines. Jagg bypass valves require at least 76 mm (3") of straight hose.

PROGRESSIVE suspension

FORK LOWERING KITS

- Give Cruiser bike front ends that custom lowered look by lowering the forks
- Your choice of 25 mm (1") or 51 mm (2") lowering height is available at time of installation
- To maintain proper balanced geometry, it is recommended lowering the rear of the bike the same amount as the front (Progressive Suspension Series shocks available for lowering the rear); see pages 173-174
- Installing a lowering kit will decrease initial ground clearance; motorcycle will be lower to the ground, and care should be taken to avoid bottoming, especially over bumps or in turns

LEGEND REVO-A

LEGEND REVO-A COIL SUSPENSION FOR SCOUT MODELS

- Provides improved plush ride quality, control and resistance to bottoming out
- Extended coil length has larger "sweet spot" without increasing overall shock length
- Unique spring rate offers the ability to soften preload, reducing ride height and maintaining a smooth ride
- Allows minimal preload adjustments when changing between riders' weights or loads
- Adjusts by hand, no tools needed
- Easy installation
- Suspension alignment is provided by spherical bearings on both top and bottom
- External knob has six adjustments to allow fine-tuning of rebound
- Provides optimum rebound performance for any given rider weight, personal ride quality preference or personal riding style
- Light to heavy riders can fine-tune ride preference
- Available only in black type III hard coat anodize

NOTE: For solo rider only, with total weight of 113 kg (250 lb) or less.

PROGRESSIVE suspension

970 SERIES PIGGYBACK SHOCKS

- Progressive Suspension does it once again!
- Designed for performance-oriented twin shock bikes
- Feature piggyback reservoirs, high-pressure gas charge and deflective disc-valving, all packaged in a mono-tube style body
- Include progressive-rate springs
- The threaded preload adjustment and external compression adjustment knob allow for fine-tuning to provide optimum performance for rider weight or riding style
- 305 mm L (12")

PART #	DESCRIPTION
1310-1320	For 15-20 Scout models

PROGRESSIVE suspension

465 SERIES SHOCKS

- High-pressure gas monotube design for the ultimate performance
- Five-position rebound adjustment to tailor the suspension for changing conditions and riding styles
- Threaded shock body with a wide range of adjustment to fine-tune preload and sag
- Hard anodized aluminum body and components for excellent durability and corrosion resistance
- 46mm bore and deflective disc piston provides precise damping
- 16mm hard chrome shaft rides on custom Viton® seals for low friction and leak-free reliability
- Each shock is custom-tuned (damping and spring rate) for each fitment

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

1310-2084	For 19-20 FTR1200 models

All part numbers in BLUE are new for 2022.

PROGRESSIVE suspension — FREQUENCY SENSING TECHNOLOGY — GTÜ APPROVED

444 SERIES

- Features the Frequency Sensing Technology (FST) which allows the shocks to sense the frequency of a bump and automatically adjust damping for superior ride quality
- Deflective disc valving
- Adjust spring pre-load by hand, no special tool needed
- Includes a progressive-rate spring and is high-pressure gas charged for consistent performance
- Standard or heavy-duty spring rate with a black or chrome finish
- Sold in pairs

NOTE: A shock which is slightly longer than stock may alter the head angle slightly and provide somewhat quicker steering.

NOTE: A shock which is slightly shorter than stock may slightly alter the head angle and provide somewhat slower steering.

1310-1576

1310-1587

NOTE: Heavy-Duty Applications are recommended for bikes that are operated at or near the manufacturer's maximum load rating over 50% of the time.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

WIRE GAUGE SELECTOR
It's important to match up wire diameter and current properly. To choose the right gauge wire, you will need to know how much Wattage (or Amperage) you will draw and what the length of the cable will be.

NOTE: The chart below is based on a 12V system. To find the appropriate wire for 6V systems, the Amp and Watt numbers should be divided in half.

AMP.	WATT	91 CM (3 FT)	152 CM (5 FT)	213 CM (7 FT)	305 CM (10 FT)	457 CM (15 FT)

FORMULAS

DISPLACEMENT

Bore x bore x stroke x 1,5708 = Displacement in Cubic Inches

Bore x bore x stroke x 25,744019 = Displacement in Cubic Centimeters

Example: A stock 96" Twin Cam has a bore of 3,750" and a stroke of 4,375".

Formula: 3,750" x 3,750" x 4,375" x 1,5708 = 96,64 cubic inch

3,750" x 3,750" x 4,375" x 25,744019 = 1583,86cc

COMPRESSION RATIO

Ratio = Cylinder displacement plus combustion chamber volume divided by combustion chamber volume.

Example: A 96" cubic inch Twin Cam has 794cc per cylinder. Combustion chamber volume is approximately 86cc.

Formula: 794 + 86 = 880 : 86 = 10,2:1 Compression Ratio (CR)

Note: When calculating compression ratio, do not forget to include gasket thickness, valve pockets and ringlands in the piston. CC-ing the heads, filling them with fluid after heads have been installed, will give you accurate numbers.

HEAD/BASE GASKET VOLUME

Bore x bore x 12,87 x compressed gasket thickness = Gasket volume in cubic centimeters

Example: A head gasket has a thickness of 0,045"; bore is 3,750".

Formula: 3,750" x 3,750" x 12,87 x 0,045" = 8,144cc

AREA OF CIRCLE

The radius is the diameter of a circle divided in half.

Radius x radius x 3,1416 = Area of a circle

Example : A stock 96" Twin Cam has a bore of 3,750".

Formula: 1,875" x 1,875" x 3,1416 = 11,05 Inch^2

47,63 mm x 47,63 mm x 3,1416 = 7127,09 mm^2 (71,271 cm^2)

ELECTRICAL: AMPERAGE, WATT AND VOLTS

Understanding electrical current is important to prevent a meltdown within the electrical wiring of a motorcycle. It is useful to calculate what fuse you will need for a certain application.

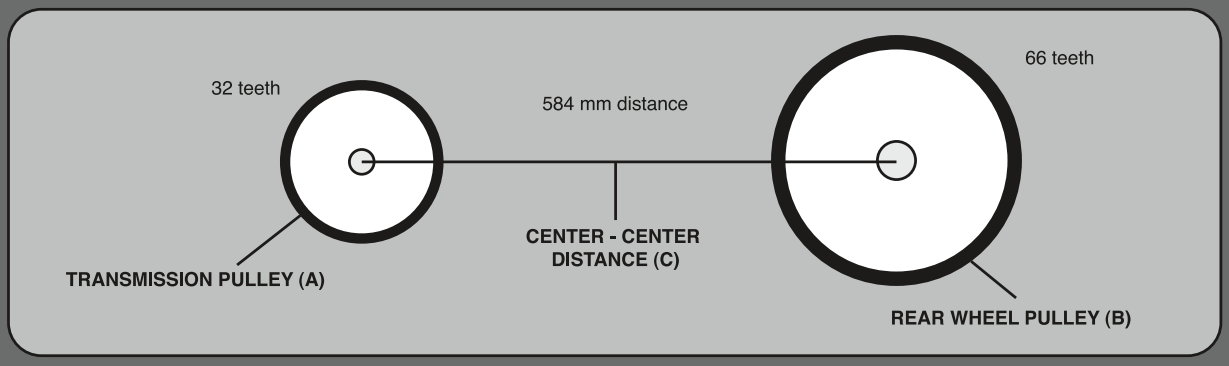
Watt divided by Volt = Amp

Amp multiplied by Volt = Watt

Watt divided by Amp = Volt

- THE 3-STEP BELT FORMULA -

How to find the correct belt



Formula

A = number of tooth transmission pulley
B = number of tooth rear wheel pulley
C = center to center distance between both pulleys

THE 3-STEP BELT FORMULA

Step 1) $\frac{(C \times 2)}{13,8} = D$

Step 2) $\frac{A + B}{2} = E$

Step 3) D + E = Number of teeth

Example

Transmission pulley has 32 tooth
Rear wheel pulley has 66 tooth
Center to center distance is 584 mm

Step 1) $\frac{584 \times 2 = 1168}{13,8 \text{ (belt pitch)}} = 84,6$

Step 2) $\frac{32 + 66}{2} = 49$

Step 3) 84,6 + 49 = 133,6 teeth
This means you must use a 133 tooth belt, because 137 tooth is not manufactured
