- **SM-5 HELMETS** Constructed from a special lightweight and impact
- resistant thermo-injected polymer results in a significantly lighter helmet with increased structural strength and outer shell uniformity in two outer shell sizes
- Inner shell includes multi-density advanced EPS construction for optimal impact absorption performance in three sizes
- Features two concepts for impact energy management including a resin-coated inner shell surface that noticeably improves impact resistance and reduces linear acceleration values and an elastic joint to connect the helmet's inner shell and comfort liner to move independently in a crash scenario with an oblique impact, thereby spreading the energy forces from an impact, reducing rotational acceleration
- Uses Alpinestars Emergency Release System (ERS) consisting of removable cheek pads for safe, quick, easy and safe removal of the helmet by trained medical professionals/ emergency responders in the event of a crash

- The ERS features easy to locate pull-tabs for rapid release of the cheek pads, thus minimizing risk of additional injury
- Includes a multi-angle, quick-release visor system that is flush over the helmet's shell to diminish the visor protrusion from the helmet thereby enhancing safety, doesn't use screws used in the visor for increased levels of safety and convenience to be easily adjusted and allows for ease of detachment from and reconnection to the helmet in order to facilitate helmet cleaning and maintenance
- · Designed to offer exceptional ventilation to prevent overheating on warm track/trail days, with the inner air network channeling combining with the outer-shell's multi-air inlets and exhaust ports for effective ventilation and high levels of heat transfer exchange
- · Hydration tube compatible channels are intelligently integrated into the helmet's cheek pads for convenience and performance
- · Available in sizes listed; see Alpinestars helmet size chart on page 8 before ordering
- ECE 22.05 certified

# HALLMAN COLLECTION

Founded in 1968 by four-time World Motocross Champion Torsten Hallman, Hallman Racing is America's first motocross racewear brand. Torsten, a true original, was one of the men who introduced motocross to the United States and revolutionized everything from the way we ride to what we wear. Realizing the American racer's potential, Torsten saw the need for quality motocross gear, so he began importing pants, jerseys and gloves under the brand name Hallman Racing, or THOR (Torsten Hallman Original Racewear).

We are proud to celebrate over 50 years of racing heritage with the new Hallman Collection by THOR. Authentic in every aspect, the Hallman Collection is inspired by the roots of the brand and offers timeless style for all things on two wheels. The First. The Forever.

#### **WIRE GAUGE SELECTOR**

It's important to match up wire diameter and current properly. To choose the right gauge wire, you will need to know how much Wattage (or Amperage) you will draw and what the length of the cable will be.

NOTE: The chart below is based on a 12V system. To find the appropriate wire for 6V systems, the Amp and Watt numbers should be divided in half.

AMP.	WATT	91 CM (3 FT)	152 CM (5 FT)	213 CM (7 FT)	305 CM (10 FT)	457 CM (15 FT)
