# G-FORCE DRIVE BELTS

## G-FORCE C12 DRIVE BELTS

- The first CVT belt utilizing a carbon tensile cord, combining minimal stretch with extraordinary strength
- Carbon tensile cords are bonded with aramid fiber-loaded rubber with a specially formulated adhesion gum; this results in increased side-load resistance, preventing belt distortion and edge-cord pullout
- Gain optimal power transmission for faster acceleration, improved throttle response and consistent shifting performance

## G-FORCE STANDARD DRIVE BELTS

- OEM-constructed drop-in belt with no clutching adjustments
- Viability testing completed to match shift curves
- Dynamometer testing proves G-Force belts outlast other high-performance belts by as much as five times
- Advanced aramid tensile cords and reinforced fiber-loaded undercord are used in construction for durability and dependability
- Proprietary measuring technology ensures exact fit
- Construction utilizes double- and single-cog configurations to match OEM belt designs maximizing heat control and flexibility

## BELT AID UTV BELT SAVER SYSTEM

- Enjoy a more reliable and stress-free ride with no belt breaking due to overly high heat issues commonly seen with today's UTVs
- Belt AID "black box" uses the stock ECU's data connection port to read and make split-second decisions on when, and how long, to inject fluid into the intake of clutch ducting system
- This misting system will cool entire intake track and belt down to a temperature that is sustainable for miles of use
- Model-Specific systems are completely plug-and-play with no splicing or cutting of any factory wiring
- Uses all OEM style plugs when connecting to the factory harness
- Available in model-specific or universal systems
- Optional connection splitter allows you to have 2 diagnostics/CAN-bus connections
- Optional Belt AID temp gauge system available

**EACH SYSTEM REQUIRES YOU TO ORDER:**
**1. MODEL-SPECIFIC OR UNIVERSAL BELT AID BELT SAVER**
**2. COOLANT TANK (UNIVERSAL SYSTEM ALSO REQUIRES TEMP GAUGE)**
**3. COOLANT TANK MOUNT KIT IF REQUIRED**

## 520 FB CHAIN

- This is the top of the line. The strongest, most durable sealed chain that we offer
- FB = Fine Blanking, an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin and bushing union accurate and strong
- Due to the accuracy of the cuts and the use of stronger alloyed steel, the FB has our highest tensile strength rating, nearly 8000 lb
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- Recommended for applications 450cc and above
- Replacement connecting link available

Rear sprockets

# SPROCKETS

## ALUMINUM REAR SPROCKETS

- Computer-designed to meet your ATV needs
- CNC-machined, not stamped like so many other sprockets
- Sprockets are constructed from 7075-T651 aluminum and hard-anodized black for superb strength and light weight
- Moose's non-grooved design means more aluminum stays in contact with the chain for longer sprocket life

## CHROMOLY STEEL FRONT SPROCKETS

- Machined from impact- and wear-resistant chromoly steel
- Inner splines are broached to provide maximum spline-to-countershaft contact; this helps distribute driveline forces over the largest possible area
- Heat-treated, then finished with a nickel coating for corrosion resistance and lubricity

## BALL JOINT AND KING PIN KITS

- Ball joint kit is sold per A-arm and comes with snap ring and cotter pin
- King pin kit (used in applications where a king pin was used rather than a ball joint) includes all bushings, pins and seals needed for repair
- Ball joints feature heavy-duty steel cases with POM-M90 bearing material for long life
- Put an end to premature Honda ball joint failure by upgrading from the OEM aluminum joint to our heavy-duty steel joint
- Inexpensive replacement for those Kawasaki and Suzuki applications that otherwise require purchase of a complete A-arm or steering knuckle

## CARRIER BEARINGS

- Factory carrier bearings are notorious for premature wear, leaving you with vibration that will lead to other drivetrain parts failures down the road
- Housing is made from 6061 billet aluminum

## SHOCK REBOUND SEPARATOR VALVES

- Replace the stock shaft nut with an asymmetric valve to offer different flow rates for compression and rebound
- The stock low-speed rebound adjuster flows at the same rate during compression and rebound, which makes the lowest speed damping too mushy, causing bottoming and an unresponsive feeling during long-duration hits; shock rebound separator valves correct this issue

## UPPER AND LOWER A-ARM UPGRADE KIT

### FOR KAWASAKI BRUTE FORCE

- OEM design incorporates small spherical bearings that carry the load of the entire front end
- Over time, spherical bearings become loose and external seals break due to excess play and that allows contamination to pass into the assembly
- Upgrade kit contains acetal thermoplastic bushings and hardened ground pins for the entire front end of the machine
