- Provides great power with exceptional sound that is adjustable and not obnoxiously loud
- Muffler allows for the use of a quiet cap to adjust the sound levels
- With a quiet cap, this muffler still sounds mean, but does not have that loud tone
- Uncapped, the exhaust has a growl that is not over the top, but will surely let people know you mean business
- Ceramic coating holds a great amount of heat into the pipe and is meant to withstand the high temperatures of exhaust components
- Gain horsepower with even better low to mid-range grunt
- For better results a performance header is recommended
- Optional quiet cap available separately

## FRONT TOW HOOK

### FOR POLARIS RZR 1000 14-18 (ALL), RZR TURBO 16-18

- Heavy-duty front tow hook for most Polaris RZR models
- Thick plate steel construction with dual reinforcements makes this a very over-built tow hook
- Aggressive design and beefy five-point mounting make this a must-have accessory
- We designed it not to stick out too far from the machine but still have the capability of using either a tow strap or winch hook for towing
- Mounts below the winch area so it normally will not interfere if you have a winch mounted
- Will NOT fit with most front bumpers
- Black powdercoated finish will look great for years

## UTV FLARE™ WINDSHIELD KITS

- Constructed from hard-coated polycarbonate – the same material used to create bulletproof windows
- Provide the wind/debris protection without sacrificing your ability to see
- Innovative Flare™ Windshield design features "hips" at outer edge of shield that re-route air; and a "flip" at the top is designed to kick the air up and back to deliver clean, less turbulent air for driver and passenger
- R-Spec UTV Flare™ windshield measures 95 mm (3,75") shorter at the flip than the original UTV Flare™ for increased visibility and creates better sightlines for technical driving
- Clamps and thumbscrew turn knobs are machined from billet aluminum with a black anodized finish

## CONTROL CABLES

- OEM-style cables are available in a wide variety of applications for most popular models
- Cables have nylon-lined housings and use precise OEM component dimensions
- Terminator clutch cables are available for several models; wires in the outer casing are wound lengthwise instead of around the cable to eliminate compression and spongy clutch feel

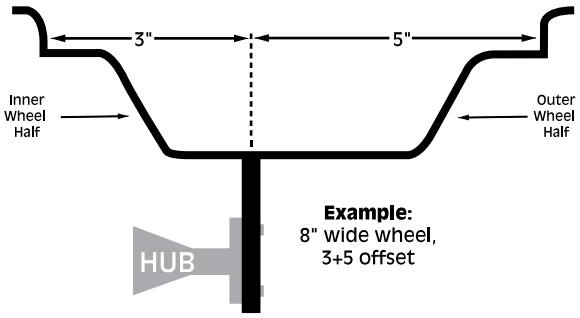
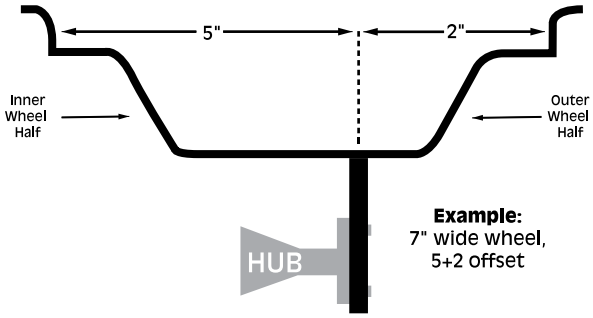
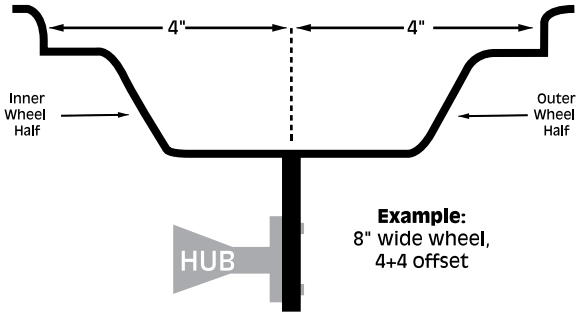
## HOW TO MEASURE BOLT PATTERN





**3-LUG – Middle of one hole to outside line across other two holes (example 3/100)**



**4-LUG – Middle of two holes directly across from one another (example 4/110)**

**NOTE: Wheels listed as Replacement Steel are ITP (see pags 342-343) or AMS (see page 359).**

## HOW TO READ WHEEL OFFSETS

**Additional Note: ITP's SS Alloy series of wheels have an "ET" cast into the back side of the spokes. Loosely translated from its German origins, this represents the "insertion depth" of the wheel, which is the offset of a wheel in distance from its hub mounting surface to the centerline of the wheel.**

## BRAKE PADS

- Sintered metal pads offer a powerful initial bite and optimal wear resistance in extreme conditions
- They provide a progressive feel at the lever and offer high thermal stability up to 600 °C/1000 °F degrees; no fading on high-speed downhills
- 100% compatible with OEM stainless steel rotors, but are designed especially to match Moto-Master brake rotors in performance and feeling
- Bedding-in time is low as optimal pad/disc contact is achieved after eight to 10 stops

### 11 COMPOUND

- All-around sintered pads for off-road and MX competition with a high performance/wear ratio
- ECE-R90 approved

### 21 COMPOUND

- Sintered, high temperature- and high wear-resistant pads are ideal for wet MX, Enduro and Rally Raid use
- Not ECE-R90 approved

### 22 COMPOUND

- Sintered, high temperature- and high wear-resistant pads are ideal for wet MX, Enduro and Rally Raid use, softer than the 21 compound for increased stopping power and optimal rider feedback
- Not ECE-R90 approved

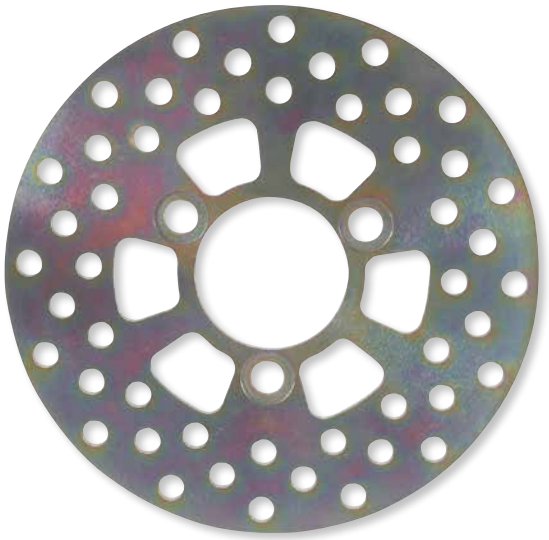
GALFER PERFORMANCE BRAKING SYSTEMS



## CUBIQ® BRAKE ROTORS

- Named after the crystal steel molecules, the Cubiq® brake rotor combines state-of-the-art technology with modern design
- Rotor shape promotes uniform brake pad wear - the same contact surface between the pad and disc every revolution generates regular wear
- Less unsprung weight (up to 40% lighter than standard round rotors) reduces gyroscopic effect and improves the manueverability of the motorcycle
- Increased perimeter surface design generates more cooling surface around the rotor for better temperature dissipation
- Available in fixed design for rear applications
- Sold each

**NOTE: For maximum braking performance and rotor longevity, Galfer recommends using Galfer brake pads with Galfer rotors. Please see pages 429-430 for Galfer brake pads.**
