BALL JOINT AND KING PIN KITS

- Ball joint kit is sold per A-arm and comes with snap ring and cotter pin
- King pin kit (used in applications where a king pin was used rather than a ball joint) includes all bushings, pins and seals needed for repair
- Ball joints feature heavy-duty steel cases with POM-M90 bearing material for long life
- Put an end to premature Honda ball joint failure by upgrading from the OEM aluminum joint to our heavy-duty steel joint
- Inexpensive replacement for those Kawasaki and Suzuki applications that otherwise require purchase of a complete A-arm or steering knuckle

HIGH-PERFORMANCE ENGINE VALVES

- Titanium valves are stronger and more reliable than OEM because they're forged as one unit, rather than pieced together like stock valves
- Treated with either CVD or CNI (depending on the application); both applications are wear- and friction-reducers that resist heat penetration as well
- Stainless steel valves are manufactured to exacting tolerances from the highest-grade material; coated for longevity and peak performance
- Sold each

TITANIUM REPLACEMENT VALVES

- Crafted from military-spec certified Ti3Al titanium alloy, these valves are made to endure the harshest racing conditions
- Forged from a single blank, grain flow is improved to enhance the mechanical characteristics of the valve without having to resort to welding
- Special PVD, CVD and CrN coatings are used to provide low-friction surfaces that reduce heat generation and resist carbon build-up; coatings allow alloys like titanium to become ultrasmooth while reaching hardness levels 5x that of high-speed steel

IRON ALLOY VALVE SEATS

FOR STEEL VALVES

- Premium valve seats for applications using steel valves
- A specific combination of alloys allowed a creation of high density, iron-based valve seat with uniform hardness, exceptional thermal qualities and high resistance to wear and recession caused by microwelding
- Only by using the latest developments in powdered metal technology were we able to blend these alloys to give a seat material with the qualities required for today's engines
- These seats have been tested on the track and street in high rpm applications with leaded, unleaded and oxygenated fuel, as well as methanol, ethanol, nitrous and forced induction applications
- Sold each

NOTE: All applications listed use two intake and two exhaust seats unless otherwise noted.

NOTE: The seats listed below are only recommendations for specific applications. Always measure your application and have the valve seats installed professionally.

PISTON KITS, RINGS, WRIST PINS AND CIRCLIPS

- All pistons are heat-treated with a T-5 hardening and tempering cycle
- All piston skirts are coated with a high-tech molybdenum disulphite coating for faster break-in time and increased piston life
- Cast piston kits are gravity-cast aluminum alloy (not forged) with 18% silicon content, which produces an extremely light but very strong piston
- Forged pistons are forged from 2618 aluminum for superior strength and durability
- Forged High Compression pistons improve power and torque across entire rpm range
- Big Bore pistons increase engine's displacement, torque and peak horsepower
- Forged Replica pistons are forged OE replacements
- Replica pistons and all rings are OEM replacements
- Kits include piston, rings, wrist pin and circlips
- Replacement two-stroke piston rings sold individually; four-stroke piston rings sold as a set as needed

NOTE: Top end kits include piston kit and a top end gasket kit, top-end bearing and cam chain.

NOTE: Vertex piston rings fit Vertex pistons only.

HIGH-PERFORMANCE ATV TOP-END GASKET KITS

- Gaskets and gasket sets used by professionals in high-performance machines and as OE replacements worldwide
- Each PART # contains the proper number of gaskets for one application

TOP AND BOTTOM END GASKET KITS

- Top-end gasket kits include correct base, head gasket and cylinder O-rings as well as other top end-specific O-rings or seals needed for R&R of top end
- Bottom-end gasket kits include correct oil seals, O-rings, drain plug washers, water pump cover gaskets
- Materials will vary depending on what is correct and engineered for specified application
- Some kits available with clutch and magneto cover gaskets made from EST material instead of fiber; see chart

COMPLETE ENGINE GASKET KITS

- Purchase a top-end and a bottom-end gasket kit for a complete gasket kit when doing a total engine rebuild

EXHAUST GASKETS

- Made for extreme temperatures
- Gasket material and construction will vary by application to ensure longevity with leak-free performance under all conditions

CLUTCH AND STATOR COVER GASKETS

- Clutch and stator cover gaskets are made from an AFM Material which is a chemically blown, compounded nitrile synthetic rubber bonded to an aluminum core
- Aluminum core gives the gasket strength for a superior seal and prevents the gasket from weeping or crawling out in today's engine cases with limited sealing surfaces
- No sealants required for installation
- Save service time as AFM will not stick to the engine case, making replacement quick and easy; no more scraping

VALVE COVER GASKETS

- Valve cover gaskets are made from application-specific materials to ensure longevity and correct fitment for a leak-free seal
- Provide quality, high-tech sealing solutions at a lower cost than the OEMs
