## THRESHOLD™

The Threshold™ brings ICON® DNA—aggressive lines, dynamic design—to the modular game. Built for riders who demand versatility without compromise, it blends a sleek, aerodynamic shell with the convenience of a flip-up chinbar for quick conversations, fuel stops, or just catching a breath.

## ULTRAFLITE™

The modern motorcyclist knows every ride is a test of awareness and response. The ICON® ULTRAFLITE™ is our answer to these riders who demand the adapting versatility to survive the street. The sleek, sharper design is showcased by our Speedwing Supervernt, new Ultrashield™, Dropshield Ultra™ as well as the Mips® brain protection system. The ULTRAFLITE™ is a relentless response to the evolution of the modern rider.

## AIRFRAME PRO™

The modern riding position - higher rear sets, lower clip-ons - has dramatically altered how a rider interacts with the modern hypersport motorcycle. Compressed into an ever more compact shape, the rider's head positioning requires increased angle to maintain visibility and stability. With this in mind, ICON® designed the AIRFRAME PRO™.

## DOMAIN™

After a decade-long absence, the Domain™ returns to the ICON Helmet lineup with a decidedly neo-retro twist. The Domain™ features a hand-crafted FRP shell for maximum integrity with minimal weight. In addition, a prominent dorsal ridge, large brow-mounted intake vents, and channeled EPS provide increased ventilation. This increased ventilation greatly enhances rider comfort when paired with the removable Hydradry™ liner. Finally, we've enabled the digital aspect of the Domain™ with the optional HelmLink Bluetooth® communication system.

## AIRFLITE™

A neo-retro glimpse into one possible future, the AIRFLITE™ is the vessel of your dreams. The visually-defining shield makes a statement on the streets while the helmet's versatility and customizable ability speak to the development and design. Remove the shield, replace it with the AIRFLITE™ visor, and the helmet goes from street to dirt in a matter of moments. Combine that with a recessed twin-channel cooling system, Hydradry™ comfort liner, inner DROPSHIELD, sculpted neck-roll, and internal speaker pockets, and you get the ultimate street-style helmet.

## AIRFORM™

For almost two decades, ICON® Motosports has come to define moto-street style. Proven design, comfortable fit, and superb quality for the maximum value, the AIRFORM™ helmet is an excellent entry point into the ICON® family. Includes world-renowned Hydradry™ comfort liner, ventilation, and an inner DROPSHIELD for those rides that start before sunrise and end well after the sunset. Highly customizable for those who like to dial it in.

**SAFETY WARNING:** Riding a motorcycle is a dangerous activity. No helmet can protect a wearer against all possible impacts. When riding, always wear a helmet, eye protection, protective clothing, gloves and boots. There is no assurance that serious injury or death can be avoided even if you wear a helmet. Take all precautions to avoid every risk when riding a motorcycle. This helmet is not meant for use as a fire retardant product and does not contain any fire retardant materials. Please ensure that your ICON® products fit properly. Improperly fitting products can impair your ability to control your motorcycle.

**WORLD'S FIRST PERFORMANCE SPORT MODULAR HELMET**

Purebred for the street has been our mantra since day one, and it's the reason we created the Threshold™ helmet. Built for riders who demand versatility without compromise, it blends a sleek, aerodynamic shell with a positive locking modular chinbar for quick conversations, fuel stops, or just catching a breath. Its handcrafted FRP shell meets world safety standards, while oversized intakes and exhaust ports channel air through a deeply sculpted EPS for maximum cooling. The Fog-Free Threshold Dropshield™ knocks down sun and glare in an instant, and the quick-change fog and distortion free Threshold Shield™ keeps your vision razor sharp. Inside, the Hydradry™ comfort liner wicks away moisture. The Threshold Helmet is engineered from the asphalt up, for the streets where ICON lives and breathes.

**SUMMONED FROM SHADOWS. UNLEASHED ON THE STREET.**

Legend tells of Takiyasha-hime, a sorceress of the 10th century who conjured a colossal skeleton from the bones of fallen warriors. This nightmare was sent out to hunt down those who dishonored her father, its long fingers reaching out for vengeance. Under the moonlight, her true form is revealed along with a guardian dragon who ensures her will is cast without interruption. Beneath this ancient terror, it's pure ICON® street DNA: a handcrafted FRP shell, oversized venting, flip-up chinbar, fog-free Threshold Dropshield™, quick-change Threshold Shield™, and Hydradry™ comfort liner. Whether taking on blistering sweepers or midnight urban roads, wield vengeance.

**YOUR EDGE IN THE EVOLUTION OF THE STREETS.**

The modern motorcyclist rides in the crosshairs. Every mile is a test of awareness, skill, and nerve. An oversized viewport covered by a full-length shield offers an unobstructed view, while the Dropshield Ultra™ provides maximum on-demand eye-shade. The aggressive profile is defined by the Speedwing Supervent, which provides increased stability and venting at speed. Within its deeply channeled and vented EPS liner sits a Mips® Brain Protection System providing angled impact mitigation. In solid form, the Ultraflite™ speaks for itself. A defiant aegis against the streets' harshest truths.

**WHAT IS MIPS?**

When a helmet with Mips® Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. See [mipsprotection.com](http://mipsprotection.com).

# AIRFORM™ MIPS® CRESTFALLEN™ HELMET

ECE R22.06

INCLUDES CLEAR & DARK SMOKE OPTICS SHIELD™  
INCLUDES DARK SMOKE DROPSHIELD™

The Crestfallen™ has risen, and only the road dares speak its name. Passed from one wrath-bound soul to the next, it is more than a helmet—it is a legacy carved in ash and speed. Forged in polycarbonate and sanctioned by the laws of men—DOT, ECE, and beyond—it was never meant for peace. It was born for retribution. Across its surface, the largest glow-in-the-dark skull we've ever summoned burns eternal—an unholy beacon that stalks the living and marks the rider as a harbinger of reckoning. Within, the Hydradry™ liner pulls the sweat of pursuit, while the Optics™ shield locks down like a vault. Behind it, the Dropshield™ waits in silence, a second sight for those who ride into the horizon. The Crestfallen chooses its rider—and rides until the debt is paid.

## HELMET FITMENT

### CHOOSING THE CORRECT HELMET SIZE

Helmet fit is critical to helmet protective performance. The correct helmet size can only be checked and confirmed by physically fitting the helmet to the user. Always try the helmet on in a store, before purchasing it, to be sure you are purchasing the correct sized helmet for you.

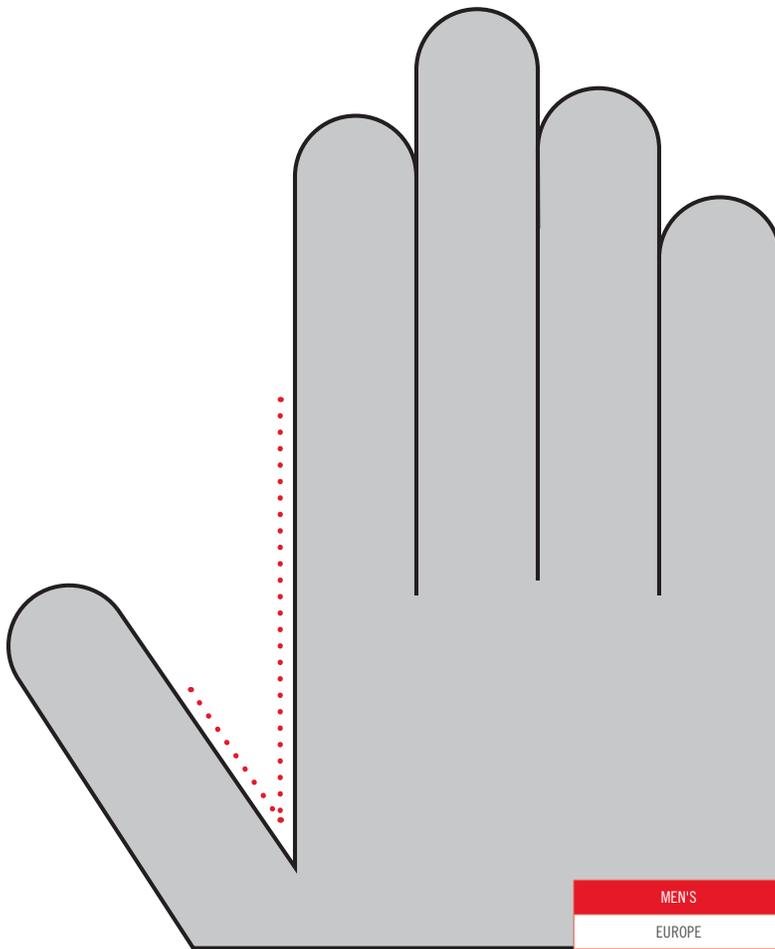

### HEAD MEASUREMENT INSTRUCTIONS

Wrap a flexible tape measure around your head approximately one inch above the eyebrows and ears. Use this measurement (in either inches or centimeters) to find your helmet size.

### HELMET SIZING INFORMATION

To achieve proper helmet fitment, begin by finding your head circumference size using the method described. Remember that the helmet size you choose should fit around the crown of your head comfortably with no pressure points. The cheekpads should fit firmly around your face. Once your chin strap is fastened, grab the chin bar of the helmet and move it side to side. Your cheeks should move with the helmet, which should not slide across your face. Different thickness cheekpads can be purchased to obtain the best fit. Ask your dealer or visit [www.rideicon.com](http://www.rideicon.com) for more information.

When sizing your helmet please refer to the size charts that are unique to each helmet shell.

## GLOVE FITMENT

### HOW TO DETERMINE YOUR GLOVE SIZE

ICON glove size is determined by measuring the width of your palm at its widest point - a little below the knuckles. To get this measurement, place your hand on the page as shown with the crook of your thumb positioned at the "V" intersection of the two dotted lines and on top of the Men's and Women's measuring bars.

THIS CHART SERVES ONLY AS A GUIDE. TO ENSURE THE PROPER FIT ALWAYS TRY ON THE ACTUAL PRODUCT.

## JACKET FITMENT

### JACKET SIZING INFORMATION

There are three variables to consider when sizing an ICON jacket. The first two are the chest and sleeve measurements, which are what your jacket size is based on. The third is the jacket fit type, which defines the "cut" of the jacket (Attack, Sport, or Relaxed). Instructions, sizing charts and jacket fit details can be found below. The fit type of every ICON jacket can be found in the first bullet point of the copy block for that individual product.

 » TAILORED BODY  
 » PRECURVED ARMS

**SPORT**  
 » STRAIGHT BODY  
 » ARTICULATED ARMS

**RELAXED**  
 » STRAIGHT BODY  
 » STRAIGHT ARMS

### CHEST MEASUREMENT INSTRUCTIONS

While standing with your arms relaxed at your side, wrap a flexible tape measure around your chest at its largest point. The tape measure should go through your armpit and stay parallel with the floor while taking the measurement.

### SLEEVE MEASUREMENT INSTRUCTIONS

While standing with your arms relaxed at your side, place one end of a flexible tape measure on your spine at the base of your neck. Measure over the top of your shoulder, down over the point of your elbow, and finish at the wrist bone.

## PANT FITMENT

### PANT SIZING INFORMATION

There are three variables to consider when sizing ICON pants. The first two are the waist and inseam measurements, which are what your pant size is based on. The third is the fit type of the pant. Measurement instructions and sizing charts can be found below. The fit type of every ICON® pant can be found in the first bullet point of the copy block for that individual product.

### WAIST MEASUREMENT INFORMATION

While standing in a relaxed position, measure around your natural waistline, while keeping the tape measure parallel to the floor.

### INSEAM MEASUREMENT INFORMATION

While standing in a relaxed position, measure the total length of the inside of your leg, from crotch to ankle.
