ABSOLUTE PROTECTION THE EASY WAY

The technology in textiles

AAA-Monolayer with XTM-Fiber®

The XTM-Fiber® innovation gives you a thinner monolayer version that is perfect for the warmer months. Integrated XTM-Fiber® strikes an ideal balance between top protection and excellent wearing experience.

Twolayer XTM-Fiber®

Our specially developed XTM-Fiber® strikes an ideal balance between top protection and excellent wearing experience. The outer layer is extremely abrasion-resistant for maximum protection in a fall. A breathable mixed fibre lining in Coolmax® hugs the skin and keeps you cool and fresh.

CE Certification

All John Doe® products are tested and certified according to the most recent CE standard applicable.

Water-repellent and breathable

Most of our products have a dirt and water-repellent coating to keep dirt from the road or the odd rainy spell from spoiling your trip. A breathable mixed fibre lining in Coolmax® hugs the skin to keep you cool and fresh while wicking away moisture towards the surrounding air.

Multistretch

The interwoven Lycra® keeps XTM-Fiber® especially elastic, accommodating your movements as you ride.

Protector ready

Almost all the items in our collection are reinforceable using super comfortable protectors. All you need to do to upgrade your item is to fit the knee, hip or back protectors on your trousers, shirt or jacket for even more impact protection.

Protector Air Knee

Level: Level 1 and Level 2

2704-0751 and 2704-0752

Protector Air Back

Level: Level 1 and Level 2
