LEFT HANDLEBAR CONTROLS PIGTAIL HARNESS
If the switches on your left handlebar cluster quit working or are erratic, check the terminals and plug.

HEADLIGHT PIGTAIL HARNESS
If you broke the headlight connector we can help. This direct replacement plug fits a huge number of Ranger models and will get your headlights working again. TRANSMISSION SENSOR PIGTAIL HARNESS
Our pigtail fits perfectly to the transmission sensor and has 229 mm (9") long wire leads.

FUEL INJECTOR PIGTAIL HARNESS
If you are getting a fuel injector code, it could be the plug and wires. Our pigtail fits perfectly to the fuel injector and has 152 mm (6") long wire leads.

Fix it now with our own version of the harness repair kit for all Keihin throttle bodies.

MIKUNI THROTTLE SENSOR PIGTAIL HARNESS

The wire harness to the T-map sensor is a well-known issue on Polaris EFI machines. Simply cut off the old harness and use the included butt connectors or solder the connections to the new pigtail.

POLARIS SPORTSMAN IGNITION KEYSWITCH PIGTAIL HARNESS
Connectors to the Polaris ATV ignition switches are prone to corroding. Cut off the old harness and use the included butt connectors or solder the connections to the new pigtail. Fits perfect to the ignition switch with a wire sheathing protecting the wires into the plug. 152 mm (6") long wires fix to the inside of the headlight pod. Sold each; includes butt connectors and zip ties.

Specifically designed to safely add up to six different accessories requiring 12-volt power onto your battery. Includes both positive and negative terminal blocks. 548X™

548X ATV/UTV WHEELS

Whether it's in the woods, deep mud or sand, the 548X is prepared to take it on. Handles load capacities from 675 lbs. for the 12x7, 14x7 front to 1150 lbs. for the 12x8 and 14x8 rear which meet, or exceed all current market requirements. Separate yourself from the herd with a line of wheels that are 100% x-rayed on the production line to ensure quality and reliability. Center caps are included with each wheel (replacement center caps 0223-0164), but lug nuts must be ordered separately.

BALL JOINT AND KING PIN KITS

Ball joint kits offer a considerable cost savings over OEM. Steel housing on some applications replace aluminum joints standard on OEM parts. POM-M90 bearing cup isolates steel rod from housing. OEM does not supply replacement ball joints on many applications. King pin kits are for smaller ATVs where ball joints are not used. Bearings are all hardened steel.

BRAKE PADS & SHOES BY DP BRAKES

Pads are constructed of durable sintered metal which stands up to the toughest conditions and provides equal braking power, wet or dry. Brake shoes are asbestos-free and offer durability and performance.

XCR BRAKE PADS

Ultimate wet condition pads. Low-wear S-47 sintered metal compound outlasts the gnarliest conditions. High-tech gray zirconium-based ceramic applied extra thick to protect brake fluid from heat.

QUALIFIER BRAKE PADS

Latest generation of Kevlar® based organic material. Progressive feel and rider feedback. No rotor wear and quiet.

OEM REPLACEMENT COOLING FANS

Easily installs using original mounting hardware. All fans are waterproof and dustproof. All fans (except Polaris fans) are typically 25% higher CFM than the stock fan. CFM = cubic feet per minute; it's a rating used to tell how much airflow a fan has. The Polaris fans are OEM compatible in design and output. Less expensive than factory replacements with more performance.

POWER VISION 3
Flash performance tunes via OEM diagnostic connector, no need to remove and send out ECU. Display vehicle data channels in real-time. Weather resistant for use in all conditions. High contrast display, viewable in direct sunlight. Fueling revised for maximum power and torque. Spark timing optimized for 91-93 octane fuel. Rev limit raised.

POWER COMMANDER V
Less than half the size of the PCIII USB. USB powered from computer (9-volt adapter no longer needed for programming). Two-position map switching function built in (map switch not included). Gear/speed input allows for map adjustment based on gear and speed. Analog input allows user to install any 0-5V sensor and build an adjustment table based on its input such as boost or temperature. With gear-postition connected, the PCV is capable of allowing each cylinder to be mapped individually and for each gear. Unit has a -100/ +250% fuel change range (up from-100/ +200%), which allows more adjustment. Ten throttle position columns (up from nine on PCIII USB). Enhanced "accel pump" utility (increased adjustment and sensitivity ranges). Made in the USA.

HIGH PERFORMANCE 4-STROKE PISTON KITS BY CP PISTONS

Pistons feature x-style forgings and fully boxed-style (race pistons). Forgings come standard with skirt coating which reduces friction, which in return reduces heat. Our race piston kits include DLC pin. Internalbracing maximizes durability while decreasing friction in the pin assembly. This technology had been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions. Full radius dome designs maximize quench while eliminating hot spots that promote detonation. Each kit includes a piston, wrist pin, circlips and a top end gasket kit. Made in the USA.

NEW MIPS® TECHNOLOGY!

HOW MIPS® WORKS

In a helmet with MIPS Brain Protection System (BPS) there is a Low Friction Layer that separates your head and the helmet. When a helmet with MIPS® BPS is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS® BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both may affect the brain and increase the risk for minor and severe brain injuries. MIPS® BPS has been scientifically proven to reduce rotational motion in certain impacts when implemented in a helmet by absorbing and redirecting rotational energies and forces that otherwise may be transfered to the brain.

F.I. SESSION HELMET

Helmet is equipped with MIPS® technology. Multi density EPS liner for impact absorption. Injection molded polycarbonate shell is lightweight, compact and strong. Nine intake and three exhaust vents feed into the internal air channels providing excellent ventilation. Unique friction hinge visor is easily adjusted and secure. Extra-large eye port for excellent field of vision. Fully removable moisture wicking liner and cheek pads. Nose guard provides excellent coverage from roost and is removable. Two shell sizes and two EPS sizes engineered for optimum fit. DOT and ECE approved.
