## JT SPROCKETS

- Computer-designed to achieve ultimate strength at minimum weight
- JT combines leading-edge technology with top materials to produce the ultimate quality sprocket range with unbeatable value
- Every sprocket meets or exceeds the highest possible quality standards
- Sprockets are heat-treated and beadblasted to reduce material surface tension
- Front sprockets made with top-quality SCM420 chromoly steel alloy
- Steel rear sprockets made with top-quality Japanese C49/C50 high carbon steel
- Aluminum rear sprockets are made with high-strength Austrian 7075-T6 anodized aluminum
- JT aluminum sprockets are about 30% lighter than a comparable steel equivalent, which reduces un-sprung rotating weight and improves performance
- Lightweight front sprockets available for some applications

## RUBBER CUSHIONED FRONT SPROCKETS "RB"

- Used by the major Japanese motorcycle manufacturers since early 1990's to dampen the chain impact on the teeth of the front sprocket
- These same sprockets are now available to the aftermarket
- Quality, design and OEM proven technology are the same as used for what is supplied to the motorcycle manufacturers

## SELF CLEANING STEEL SPROCKETS "SC"

- Manufactured to exacting tolerances and designed with special self-cleaning grooves for added life performance
- Made from the best chromoly steel and fully heat-treated for maximum durability, SC sprockets are designed for champions

## ALUMINUM REAR SPROCKETS "AL"

- Made from aviation-grade 7075-T6 aluminum alloy, optimal lightweight design and CNC machined for performance and lifespan
- Manufactured from the best materials with a special self-cleaning design, and hand-finished to perfection
- Select aluminum sprockets are available in colored options, see fitment chart

## INDUCTION HARDENED BLACK ZINC FINISH REAR SPROCKETS "BK"

- Made from C45 high-carbon steel
- Teeth are heat-induction hardened to 38-50 HRC

## RACELITE ALUMINUM REAR SPROCKETS

- JT sprockets is proud to introduce the new RaceLite range of anodized 7075-T6 aluminum sprockets
- Available in hard wearing color options, see fitment section for details

**NOTE: When installing sprockets which differ from OEM sizes, check for proper clearances before operating.**

**NOTE: For applications please use chain configurator at http://chainkit.partseurope.eu.**

## DUCATI REAR SPROCKET CARRIERS

- Fit Ducati models listed with a single-sided swingarm
- Rear sprocket carrier conversion allows fast gearing changes, reduces unsprung weight and gives the bike a unique custom look
- With the carrier, it is no longer necessary to remove the wheel to change the rear sprocket
- Ducati rear conversion sprockets are precision made from 7075-T6 aluminum and available in both 520 and 525 chain sizes
- Conversion sprockets are compatible with the JT carrier and some other aftermarket conversion carriers

**NOTE: For applications please use chain configurator at http://chainkit.partseurope.eu.**

[1] 6 mm sprocket spacer, PART #1205-0052 is available for proper chain alignment, if needed.
[4] Self-cleaning, lightweight sprocket.
[5] Aluminum, self-cleaning lightweight rear sprocket.
[7] Induction hardened black zinc finish rear sprocket "BK".
[8] Rubber cushioned front sprocket "RB".

[1] 6 mm sprocket spacer, PART #1205-0052 is available for proper chain alignment, if needed.

[5] Aluminum, self-cleaning lightweight rear sprocket.

[7] Induction hardened black zinc finish rear sprocket "BK".

[8] Rubber cushioned front sprocket "RB".

[10] RaceLite black aluminum sprocket.

[5] Aluminum, self-cleaning lightweight rear sprocket.
[7] Induction hardened black zinc finish rear sprocket "BK".
[8] Rubber cushioned front sprocket "RB".
[10] RaceLite black aluminum sprocket.

## DUCATI REAR SPROCKET CARRIERS

- Fit Ducati models listed with a single-sided swingarm
- Rear sprocket carrier conversion allows fast gearing changes, reduces unsprung weight and gives the bike a unique custom look
- With the carrier, it is no longer necessary to remove the wheel to change the rear sprocket
- Ducati rear conversion sprockets are precision-made from 7075-T6 aluminum and available in both 520 and 525 chain sizes

**1211-0326**

**1210-1453**

**1211-0989**

**1211-0990**

- Conversion sprockets are compatible with the JT carrier and some other aftermarket conversion carriers

MOOSE RACING

# SPROCKETS

## STEEL REAR SPROCKETS

- Manufactured from premium-quality C45 high-carbon steel
- CNC precision-machined to ensure tight tolerances
- Machined with lightening holes
- Black powdercoated finish

## ALUMINUM REAR SPROCKETS

- 100% German aluminum, using ISO 7075-T651 for these sprockets that receive an extra tempering, which reduces distortion and provides optimal thickness
- 100% machined, no stamping or grinding
- Optimal tooth thickness results in maximum tooth and chain contact
- We leave the "cleaning" grooves out of our sprockets, because more aluminum contacting your chain means longer chain and sprocket life
- Moose Racing rear sprockets come anodized in black

## LIGHTWEIGHT STEEL SPROCKETS

- One of the lightest 520 steel sprockets available today
- Designed using our proprietary EST Technology
- Performance and longevity all in one sprocket
- Attractive black zinc semi-gloss finish
- Lowered surface to remove unnecessary weight
- Available in a wide variety of tooth counts

## RENTHAL STREET SPROCKETS

- CNC-machined (not stamped) and feature a computer-aided ultra-light design to reduce unsprung weight and increase power transfer
- Rear sprockets made from high-strength, specially enhanced 7075-T6 aluminum that is 33% lighter than steel to further reduce weight and increase power transfer without sacrificing strength
- Rear sprockets also feature a special tooth profile that allows the chain to roll easily on and off the sprocket for longer wear, less noise and more power
- Front sprockets made from case-hardened, core-refined nickel-chrome-molybdenum alloy steel for the ultimate combination of strength and hardness

**BOLD MAGENTA** part numbers are new for 2022

## SPROCKET BOLT AND NUT FASTENING KIT

- Kit includes six sprocket bolts (8 mm), six Fuji metal-locking nuts (8 mm) and six flat washers (8 mm)
- Pre-applied thread locking agent on sprocket bolts and factory-style Fuji lock nuts creates a double-locking design that keeps the hardware tight and secure
- Metric class (grade) 10,9 for outstanding wear and durability
- Durable zinc-plated finish for ultimate corrosion protection

2401-0854

|---|---|
| Sprocket bolt kit | 2401-0854 |

2401-0545

2401-0750

## SPROCKET NUTS

- CNC-machined from 7075-T6 aluminum alloy
- Lightweight and an attractive alternative to stock heavy and bulky steel nuts
- 10 mm nuts fit most modern sport bikes with 10 mm studs
- Also available for Ducati single-sided swingarm models with a five-bolt or six-bolt hub

PB Pro-Bolt®

## TITANIUM SPROCKET NUTS

- Manufactured from 6AL-4V (Grade 5) titanium
- Stronger, lightweight and highly corrosion resistant
- Can be torqued to manufacturer's original settings
- Size and quantity vary; can be purchased individually instead of a pack; see chart

BARON Custom Accessories

## POWER PULLEY

- 34-tooth front drive pulley raises your final drive ratio and allows your bike to cruise the highway at a lower rpm
- Optimizes gas mileage and achieve pinnacle performance at highway speeds
- Installs easily utilizing stock belt
- Solid steel construction provides years of use, free from squeaks and premature wear

## ROAD STAR/WARRIOR 31-TOOTH FRONT PULLEY

- Shortens the time between stop signs
- Lowers your final drive ratio
- Direct replacement for stock pulley
- Sends your bike streaking to its top end
- Reduces the need to downshift
- Reuses stock drive belt

PARTS EUROPE

## CHAIN AND SPROCKET KITS

- Front sprocket, rear sprocket and a precut chain make a convenient kit for the dealer or consumer
- Sprockets are made of high-quality steel and have OEM gearing
- Chain is Regina's high-performance Z-ring series with gold outer plates and Z44 sealing rings, which dramatically improves performance and wear life; includes rivet-type masterlinks
- See Regina Chain Specifications chart for chain rating information

### RT SERIES

- Economical chain for street application with good performance and wear life
- Carburized pins to reduce wear, and extended curl-formed bushings
- Shot-peened rollers and sideplates provide high fatigue resistance
- Suitable for touring or naked bikes up to 500cc
- Gold color

### OR SERIES

- Top-quality chain with the latest generation of O-rings, providing long life in all types of riding conditions
- Constant lubrication from special high-temperature grease in the critical pin/bushing area
- High-carbon alloy pins to minimize wear, along with solid bushings and rollers for durability
- ORN6 O-ring chain for use on street and dirt bikes up to 600cc
- ORT2 Suitable for Street and Enduro up to 900cc
- Gold color

### ZR SERIES

- Z-ring chains feature the patented Z44 sealing rings, which greatly improve performance and wear life, making previous X-ring and Z-ring chains obsolete
- 50% reduction in friction compared to traditional O-rings
- Constant lubrication from special high-temperature grease in the critical pin/bushing area provides long life
- High-carbon alloy pins to minimize wear and increased roller thickness to prolong durability
- Thicker outer plates and quad-riveting for greater tensile strength
- Original equipment on Aprilia RSV4, BMW S1000RR, Ducati Panigale 1199, KTM RC8 and many others
- Ideal for street bikes and superbikes up to 1300cc
- Gold color

SUNSTAR EST 1946

## STANDARD AND PLUS CHAIN KITS

- Include Sunstar drive sprocket, rear sprocket and chain in their original size
- Standard kits include RDG chains; high-quality street motorcycle chain features Sunstar's own DG-ring (DualGuard) design
- When viewing the cross section of the ring there are two sealing lips and lubrication pools per side versus a single-lip design, achieving lower friction and longer life
- Plus kits include RTG1 or XTG chains where noted in the chart

- XTG and RTG1 chains feature Sunstar's TripleGuard sealed ring technology where there are three sealing lips and lubrication pools per side of the ring versus a single sided lip that is typical of standard O-rings; providing consistent protection in the harshest of environments

**RK PREMIUM**
ZXW, GXW, XSO

**MAX**
MAX O, MAX X, MAX Z

# 5 CHARACTERISTICS YOU NEED TO KNOW ABOUT YOUR NEXT CHAIN

**WEIGHT**
When every .01 second counts, so does every ounce.

**STRENGTH**
The ability of the chain to withstand extraordinary force -- such as during sudden hard braking or acceleration.

**POWER**
RK's specialty: Rigidity (not stiffness) maximizes effective horsepower by decreasing surging and chordal action, or unnecessary vibration.

**WEAR LIFE**
The ability of the chain to endure repetitive acceleration and braking.

**DURABILITY**
The ability of the chain to endure abrasive wear from sprocket teeth and debris.

## RK CHAIN FEATURES

- All RK chains are pre-stressed and pre-stretched to ensure equal load distribution and minimal maintenance
- They're made of the highest grade medium-carbon alloy steel available, with all components shot-peened and heat-treated

## RK CHAIN ORDER CHART

**NOTE: If your motorcycle came factory-equipped with an O-ring chain, it must be replaced with an O-ring chain.**

## RK CHAINS

- All RK chains are pre-stressed and pre-stretched to ensure equal load distribution and minimal maintenance
- They're made of the highest grade medium-carbon alloy steel available, with all components shot-peened and heat-treated

### STANDARD (M) SERIES

- Heat-treated medium-carbon alloy steel construction
- All components heat-treated and shot-peened for maximum strength
- Two-point pin riveting and solid rollers
- For motorcycles up to 400cc that did not come with an O-ring or heavy-duty chain as standard equipment
- Chains include clip connecting link

### XSO SERIES

- Pro RX-ring chain lasts five to eight times longer than standard chain
- Provides two more lubricant pools than conventional O-rings for longer life
- Lubricated with specially formulated, vacuum-injected U-grease; locked in by tough nitrile butadine rubber RX rings
- Polished and shot-peened link plates
- High tensile strength ensures reliable performance
- Cut-to-length and bulk chains include rivet connecting link

### GXW/GSV SERIES

- Advanced design XW-ring provides better sealing to extend wear life up to 100 percent
- GXW Series is the lightest high-performance chain for racing & O.E. replacement as well with longer wear life, 1,5 to 2,0 times over O-ring
- Chains include rivet connecting link

**BOLD MAGENTA** part numbers are new for 2022

# SEALED CHAIN (ZXW)

- Developed to meet the spec of the latest models of extreme superbike
- Features RK's only technology of XW-Ring
- 2 lubrication pools and 3 contact lips
- Triple barrier structure to further seal the lubrication and prevent debris to enter the chain
- Designed to be the strongest, long-lasting chain available on today's market
- Highest tensile strength of all RK series and high rigidity for instant respond on acceleration
- 520 ZXW tensile strength of 42,0 kn (9.400 lb)
- 525 ZXW tensile strength of 46,4 kn (10.400 lb)
- 530 ZXW tensile strength of 49,8 kn (11.200 lb)

RK TAKASAGO CHAIN

*This graphic is a product guide. Always refer to your machine manufacturer for fitment infomation related to your machine.*

## RK MAX SERIES DRIVE CHAIN

- Maximum performance, maximum value
- Extremely high tensile strength and durability
- Made to the highest standards of quality to ensure superior performance
- Widest applications in its category

### MAX O

- Premium-quality sealed O-ring chain
- Suitable for street and off-road use
- 520 MAX O – For street bikes up to 750cc and dirt bikes up to 650cc
- 525 MAX O – For street bikes up to 900cc and dirt bikes up to 750cc
- 530 MAX O – For street bikes up to 1000cc and dirt bikes up to 750cc
- 520 MAX O chain includes clip and rivet connecting links
- 525/530 MAX O chain includes rivet connecting link

### MAX X

- Premium-quality sealed RX-ring chain
- For street or off-road use
- Available in extra-long lengths for motorcycles with extended swingarms
- 520 MAX X – For street bikes up to 1000cc and dirt bikes up to 750cc
- 525 MAX X – For street bikes up to 1100cc and dirt bikes up to 900cc
- 530 MAX X – For street bikes up to 1100cc and dirt bikes up to 900cc
- 520 MAX X chain includes clip and rivet connecting links
- 525/530 MAX X chain includes rivet connecting link

### MAX Z

- Premium-quality sealed RX-ring chain
- Built for high-horsepower applications; for use on today's extreme performance street bikes
- Unparalleled tensile strength for chains in its class
- Available in extra-long lengths for motorcycles with extended swingarms
- 520 MAX Z – For street bikes up to 1200cc
- 525 MAX Z – For street bikes up to 1300cc
- 530 MAX Z – For street bikes up to 1400cc
- Includes rivet connecting link

## HEAVY-DUTY CHAINS (MXZ4)

- Made for the serious motocross racer with all components heat-treated for high performance and durability
- Features chromoly steel construction with seamless rollers and bushings, and oversized alloy pins for added strength
- MXZ4 is the lightest and strongest MX chain on the market with an impressive tensile strength and a weight of only 2.89 lb.
- Ideal for professional level from 80cc to 500cc open class racing
- Chains include clip connecting link
- GB 520 MXZ4 – Works MX race chain
- For 125cc to 500cc applications
- Maximum tensile strength of 9,000 lb.
- Wear life index of 300

### GB 520 MXZ4 (GOLD COLOR) - CUT-TO-LENGTH

**BOLD MAGENTA** part numbers are new for 2022

## HEAVY-DUTY CHAIN (H)

- Non-sealed economical chain for heavy duty usage, improved strength compared to standard chains
- Manufactured from carbon alloy steel, heat-treated and shot-peened for maximum strength and durability
- Pre-stressed and pre-stretched for superior performance and minimize elongation during the life of the chain
- Excellent quality and cost performance for heavy duty motorcycle application
- Includes clip connecting link
- 415 H Tensile strength 18,2 kN (4.100 lb.)
- 420 H Tensile strength 22,2 (5.000 lb.)
- 428 H Tensile strength 24 kN (5.400 lb.)
- 520 H Tensile strength 34,2 kN (7.700 lb.)
- 525 H Tensile strength 34,2 kN (7.700 lb.)
- 530 H Tensile strength 34,2 kN (7.700 lb.)

## Z-RING SERIES

The new generation Z-ring seals featuring a special-designed conical shape on their inner side, patented since 2003, represents the evolution of previous X-ring and Z-ring designs. The Z-ring flexes when assembled, creating a spring effect that guarantees the seal will not decrease over time. The special S-ring section provides enhanced chain flexibility. The conical section enhances the assembling on the bushing. The lubricant trapped between the plates and the lobes of the Z-ring keeps the ring lubricated and increases its life.

- Z-ring chains feature the patented Z44 sealing rings, which greatly improve performance and wear life, making previous X-ring and Z-ring chains obselete
- 50% reduction in friction compared to traditional O-rings
- Constant lubrication from special high-temperature grease in the critical pin/bushing area provides long life
- High-carbon alloy pins to increase shock resistance and stiffness
- Increased roller thickness to prolong durability
- Thicker outer plates and quad-riveting for greater tensile strength
- Original equipment on most Aprilia, BMW, Ducati, KTM, Husqvarna and others
- Ideal for street bikes and superbikes up to 1300cc
- Gold color

Z-Ring "Spring effect"

## ZRP

- Specifically designed for application on high-powered bikes, these chains are able to offer exceptional performance thanks to the patented Z-rings
- Assembled with high-alloy steel pins and plates, solid bushings and rollers, shot-peening of plates, pins and rollers
- Pre-stressed for performance enhancing, assuring excellent resistance to mechanical stresses of the latest superbikes

## Z-RING SERIES (CONT)

### ZRT

- Aimed at tourist road use, these chains ensure high mileage with reduced elongation, thanks to the seal
- Assembled with solid bushings and rollers, shot-peening of plates, pins and rollers to increase the fatigue resistance
- Submitted to performance-enhancing pre-stretching, they are available in several quality levels to ensure the right type of chain for every application

## 520ZRE Z-RING CHAINS

- High-performance ZR chain with Z44 seal Z-ring sections
- Z-ring flexes when assembled, creating a spring effect that guarantees seal will not diminish over time
- Z-ring section also provides enhanced chain flexibility
- Features high alloy steel plates and pins, solid bushings and rollers and shot-peened plates, pins and rollers
- Pre-stretched to enhance performance
- Clip-type and rivet-type links included
- Gold color

REGINA CHAIN
PERFORMANCE IN MOTION

## 520/525 ZRA CHAINS

- Manufactured with high-carbon alloy steel
- Shot-peened rollers, pins and plates
- Solid bushings
- Pre-stretched to enhance performance
- Natural steel color
- Z-Ring seals for high mileage, reduced elongation and extended lubrication intervals

### 520 ZRA

## 520/530DR REGINA DRAG RACING CHAIN

- Designed to withstand the severe application of drag racing
- Features high-alloy steel in gold-colored plates (520DR) or nickel-plated plates (530DR) and pins and solids bushings and rollers
- Plates, pins and rollers are shot-peened for improved fatigue resistance
- Breaking strength of 4793 kg (10.566 lb) and a fatigue limit of 968 kg (2135 lb) is sufficient up to Pro Stock level
- Clip and rivet type link included

| DESCRIPTION | PART # |

REGINA CHAIN
PERFORMANCE IN MOTION

## EB-ORO/OROY SERIES

- Developed to withstand the severe stresses of off-road riding
- Larger-diameter alloy carbon steel pins and thicker plates offer increased tensile strength and fatigue resistance
- Extended bushings and solid rollers provide improved durability
- Designed especially for smaller bikes up to 85cc
- Clip type link included
- Gold color

## ORAW2/GPZ SERIES

- Developed exclusively for racing use
- Utilize state-of-the-art materials for optimum performance and durability
- Feature the patented Z44 sealing rings, which greatly improve performance and wear life, making previous X-ring and Z-ring chains obselete
- 50% reduction in friction compared to traditional O-rings
- Constant lubrication from special high-temperature grease in the critical pin/bushing area provides long life
- Suitable for supersport and superbikes up to 1000cc
- Rivet type link included (hollow rivet type connecting link available; works with many different chain tools)

| DESCRIPTION | PART # |

## O-RING SERIES

### 428 ORT2

- Top-quality chain with the latest generation of O-rings, providing long life in all types of riding conditions
- Constant lubrication from special high-temperature grease in the critical pin/bushing area
- High-carbon alloy pins to increase shock resistance and stiffness, along with solid bushings and rollers for high durability
- Suitable for street and enduro applications up to 300cc
- Rivet type link included
- Clip type and hollow rivet connecting link also available; hollow rivet type can be used with many different chain tools
- Gold color

# EK CHAINS

## STANDARD AND HEAVY-DUTY NON-SEALED CHAINS

- Super economical roller chain
- Standard chains have two-point pin riveting
- Heavy-duty H-Series chains come with four-point riveting and solid bushings for longer wear
- Special steel alloy, solid roller and pre-stretched, shot-peened parts
- All heavy-duty and standard chains include clip connecting link

## SRO/SROZ/SROZ2 SERIES CHAINS

- Value O-ring chain that doesn't compromise quality or durability
- High-tech heat-treated steel alloy construction
- O-ring seals lock in lube, lock out grit
- 630 SRO features lightening holes
- 420 SRO/428 SROZ chains include semi-press fit clip connecting link
- 630 SRO chains include rivet connecting link
- SROZ2 chains include rivet connecting link

## SRX2 SERIES CHAINS

- Excellent value for any street machine
- Features lightening holes, reduced friction and Quadra X-Ring design which increases chain life from $1^1/_2$ to 2 times longer than a standard O-ring chain
- Includes rivet connecting link

## MVXZ2 SERIES CHAINS

- Quadra-X ring design increases wear life and reduces friction by as much as 40% for maximum engine performance
- Features Zero Stretch Technology that eliminates measurable chain stretch during the first 965,6 km (600 miles) of use
- Features lightening holes in side plates and large-diameter pins
- Includes rivet connecting link

## RX SERIES CHAINS

- Proven design from countless hours of testing and actual racing
- Zero Stretch Technology eliminates measurable chain stretch during the first 965,6 km (600 miles) of use, ending the hassle of constant chain adjustments after the initial break-in period
- Includes semi-press fit clip connecting link

## ZVX3 SERIES CHAINS

- NX rings improve durability by 15% over QX rings
- Narrow seals for improved weight and stiffness
- Includes rivet connecting link

## DR2/DRZ2 SERIES CHAINS

- 530 DRZ2 was designed in conjunction with Pierre Elliott of Diamond Powersports
- 530 DRZ2 features Zero Stretch Technology that eliminates measurable chain stretch during the first 965,6 km (600 miles) of use
- 530 DR2 is for sportsman and street bike drag racing
- Includes semi-press fit clip connecting link

## RR PRO RACING SERIES CHAIN

- 415 RR chain includes clip-type connecting link

**BOLD MAGENTA** part numbers are new for 2022

## JT DRIVE CHAINS

- JT Chains produces a full range of superior quality motorcycle chains using leading-edge technology and only the highest grade of special steel alloys
- Specifications of the JT advanced power transfer chains meet or exceed the requirements of all modern motorcycles, street, MX, enduro, offroad and ATV
- A full range of chain types, from 50cc mopeds to 200+ bhp superbikes
- Leading edge technology in materials and production ensures top class performance, strength and durability
- Specially engineered to favorably compare with all types and brands of motorcycle chain on the market
- Minimum weight at maximum strength
- For applications, please use chain configurator at www.partseurope.eu

RENTHAL CHAIN

## RR4 SRS ROAD RACE CHAIN

- 520 pitch that is developed exclusively for Superbike racing applications
- Utilizes Renthal's Self Regulating Seal (SRS) technology to increase the service life of the chain in road applications; enhances chain flexibility for smoother operation
- Features high-alloy steel plates and pins, solid bushings and rollers, shot-peened side plates and gold sides
- Pre-stretched for less adjustment during break in
- Includes a pair of latex gloves for mess-free installation
- Available in 520 pitch only, average tensile strength: RR4 SRS 520 36,5 kN (8206 lb)
- Includes rivet only link

## 520 R3-3 SRS CHAIN

- Renthal's SRS (Self-Regulating Seals) system increases service life of chain
- Packaged pre-stretched for less adjustment during break in
- Rivet link has been changed to a hollow end to facilitate easier installation that does not require a Quad Stake Rivet tool to install
- High-carbon alloy steel pins, solid bushings and rollers, and shot peening of plates and rollers for increased fatigue resistance
- 520 pitch; average tensile strength 34,8 kN (7820 lb)

## MOTORCYCLE CHAIN BY D.I.D

### PU520PO, 525PO, 530PO

- Features quad pin riveting, solid bushings and rollers, and tough O-ring seals
- Shot-peened and pre-stretched
- Recommended for motorcycles originally equipped with O-ring chains
- 520 chain includes clip connecting link
- 525/530 chain includes rivet connecting link

### PU520PX, 525PX, 530PX

- Provides 1 1/2 times longer wear life than an O-ring chain and 12 times longer wear life than a standard chain
- Lower friction loss
- Features quad pin riveting, solid bushings and rollers
- Shot-peened and pre-stretched
- Quality and durability at an affordable price
- 520 chain includes clip connecting link
- 525/530 chain includes rivet connecting link

### HOW TO ORDER:

Pro Series chain is available precut as listed or bulk in 7,5 m and 30,5 m (25- and 100-foot) rolls. Precut lengths are boxed and labeled, and include a clip-type connecting link. Replacement clip-type and rivet-type connecting links are available.

| CHAIN | MAXIMUM ENGINE CC | TENSILE STRENGTH |
|---|---|---|

**BOLD MAGENTA** part numbers are new for 2022

Moose Racing chain is made through an exclusive contract with a top European supplier. Moose Racing is in a state of constant development to bring you better chain at a competitive price. The recently developed FB technology is now proven. As the FB continues to impress, the development is paying dividends through the entire range of chains.

## 520 FB CHAIN

- This is the top of the line – the strongest, most durable sealed chain Moose Racing offers
- FB = Fine Blanking, an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin and bushing union accurate and strong
- Due to the accuracy of the cuts and the use of stronger alloyed steel, the FB has our highest tensile strength rating, nearly 3628 kg (8000 lb)
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- Replacement connecting link available

## MOOSE CHAIN SPECIFICATIONS

**NOTE: Average tensile strength is NOT the same as maximum tensile strength that other manufacturers use. Maximum tensile = the absolute strongest chain ever tested. Average tensile = the average of 10 chains tested.**

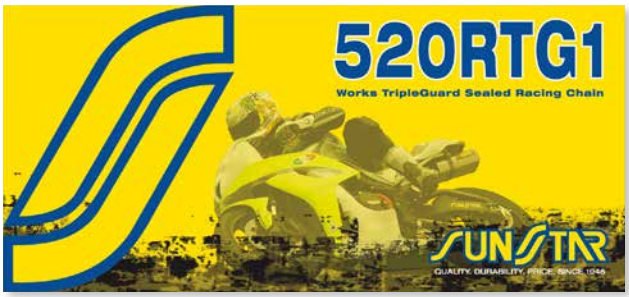
| DESCRIPTION | CC RECOMMENDATION | AVERAGE TENSILE STRENGTH |
|---|---|---|
| 520 FB | 450cc and above | 3600 kg (7937 lb) |
| 520 HPO | 350-450cc | 3400 kg (7496 lb) |
| 520 RXP Pro-MX | 125-350cc | 3302 kg (7280 lb) |
| 428 RXP | 80-125cc | 2300 kg (5071 lb) |
| 420 RXP | 50-80cc | 1999 kg (4409 lb) |

**BOLD MAGENTA** part numbers are new for 2022

# CHAINS

## MXR CHAINS

### WORKS 420 AND 428 MOTOCROSS/OFF-ROAD RACING CHAIN



- Deep gold side plates and gold inner plates
- Super-strong and lightweight design for high performance/ racing mini off-road and motocross machines
- Uses clip-type connecting link
- 420 chain achieves tensile strength of 2268 kg (5000 lb) while the 428 has approximately 2631 kg (5800 lb)
- Seamless rollers and bushings help provide the added life and durability

### SS520SSR

### 520 SEALED O-RING MOTORCYCLE CHAIN

- High-quality, durable and long-lasting standard O-ring chain recommended for any motorcycle 400cc-under
- Extremely strong with a 3479 kg (7670 lb) tensile strength
- Constructed of special, heat-treated alloy steel for the best possible strength and life that is expected of any Sunstar product
- Sunstar's O-rings keep the chain lubricated, resulting in lower friction and continuous power transfer
- Color option: natural
- Uses clip-type connecting link

### SS520RDG/525RDG/530RDG

### DUALGUARD SEALED MOTORCYCLE CHAIN

- High-quality street motorcycle chain that features Sunstar's own DG-ring (DualGuard) design
- When viewing the cross section of the ring there are two sealing lips and lubrication pools per side versus a single-lip design, achieving lower friction and longer life
- Perfect choice for high-performance riding but at a non-premium price
- Available in 520, 525 and 530 chain pitch
- Color option: natural
- Uses rivet-type connecting link

### SS520RTG1/525RTG1/530RTG1

### WORKS TRIPLEGUARD SEALED MOTORCYCLE CHAIN

- Utilizes Sunstar's exclusive TG-ring (TripleGuard) where the ring seals with three lips per side for the ultimate in heat prevention and keeping the chain lubricated even in extremely harsh conditions
- The 520RTG1 is the perfect choice for racing/ performance-oriented applications with 520 chain size
- With a tensile strength of 4218 kg (9300 lb), 525RTG1 is the perfect choice for racing/performance-oriented applications with 525 chain size
- With a tensile strength of 4491 kg (9900 lb), the 530RTG1 is intended for the large-displacement sport machines like ZZR1400, GSX1300R Hayabusa and others
- Color option: gold
- Uses rivet-type connecting link

## CHAIN TENSIONER HARDWARE KIT

- Replacement chain tensioner hardware for most stock applications of street and off-road motorcycles
- Metric class (grade) 8,8 for outstanding wear and durability
- Durable zinc-plated finish for ultimate corrosion protection
- Kit contains the following class 8,8 hardware: two each M8x50 bolts with 10 mm hex head and two each M8 flange nuts with 12 mm hex head

| DESCRIPTION | PART # |
|---|---|
| Chain tensioner hardware kit | 2401-0855 |

## REAR DRIVE BELTS

- BDL now offers Gates carbon X3N material for its rear belts
- The same brand used by Harley-Davidson since 1980 due to its reliability
- Teeth on the belts have a slick surface that is easy on pulleys
- Outer surface of the Gates belt is ribbed to help with flexibility
- Higher reliability due to increased length stability and better pitch
- Higher resistance to humidity
- Higher tensile strength and robust construction

**NOTE: No warranty claims are made or implied.**

## G-FORCE C12 DRIVE BELT

- The first CVT belt utilizing a carbon tensile cord, combining minimal stretch with extraordinary strength
- Carbon tensile cords are bonded with aramid fiber-loaded rubber with a specially formulated adhesion gum; this results in increased side-load resistance, preventing belt distortion and edge-cord pullout
- Gain optimal power transmission for faster acceleration, improved throttle response and consistent shifting performance

## G-FORCE™ REDLINE™ DRIVE BELTS

- Designed to handle the rapid acceleration and high variable torque loads of next-generation high-performance platforms
- Built with Gates® patented fiber-reinforced EE (ethyl elastomer) compound for maximum transverse stiffness and heat resistance
- 75% better dynamic axial stiffness and 50% lower speed losses from temperatures up to 170 °C (338 °F)
- High-tensile aramid cord layer with specially-formulated adhesion gum maximizes acceleration, shock load resistance, and service life
- Fabric cog jacket on rounded bottom cogs enables smooth shifting and higher abrasion resistance
- Made without chlorinated compounds for reduced environmental impact

## TCA CHAIN ADJUSTER AXLE BLOCKS

- Unique, innovative axle block
- High-precision chain adjustment by angular transmission
- Precise positioning by graded-scale
- By applying the scale, you can compensate serial tolerances
- Rear wheel position can be read off in millimeters (mm)
- Braces the axle against compressive - and tensile load
- Easier rear wheel installation
- Hard anodized black
- Optional rearstand lifter kits and bolts sets to jack up the bike; available separately
- Optional crash pads to protect axle and swingarm; available separately

## AXB CHAIN ADJUSTER AXLE BLOCKS

- Unique, innovative axle block
- Special bolt enables axle adjustment in both directions
- High-precision chain adjustment
- Precise positioning by graded-scale
- By applying the scale, you can compensate serial tolerances
- AXB stays in the swingarm during rear wheel installation
- Braces the axle against compressive - and tensile load
- Easier rear wheel installation
- Hard anodized colors: black, gold or red
- Fit with the OEM axle nut

## FORGED ALUMINUM WHEELS

- Includes wheel kit, bearings, bushings and spacers
- OEM brake discs are used for all applications
- Features MotoGP and Moto2 technology
- Constructed of high-grade aerospace aluminum
- High-pressure forging at 30.000 tons is used to further improve grain structure, then CNC-machined
- Weight load for static wheels on the front wheel is 295 kg, rear wheel is 375 kg
- Sold in a set; includes one front wheel (3,5 x 17) and one rear wheel (6 x 17)

## WHEEL BEARING AND SEAL KITS

- High-speed bearings are manufactured to ABEC 3 precision levels
- Triple-lip rubber seals keep the grease in and the water and dirt out
- Chevron SRI 2 grease contains rust and oxidation inhibitors (-29 °C to 177 °C (-20 °F to 350 °F))
- Double-lip type TC seals with stainless steel garter springs

## WHEEL BEARING AND SEAL KITS

- Exact OEM replacement bearing and seal kits bring back the steering and braking control lost due to worn or rusted wheel bearings
- Each kit includes necessary bearings and seals to completely rebuild each hub
- Double-sealed ball bearings keep moisture and contamination from entering bearing
- Seals ensure proper fitment
- Kits are available separately for front and rear wheels

## CAPTIVE WHEEL SPACERS

DRIVEN

- Held in place by dust seal
- Anodized for superior corrosion resistance
- Ideal for racers and enthusiasts alike
- Helps to prevent lost wheel spacers during wheel removal

[1] If stock sprocket side spacer measures 19,25 mm, use PART #0214-1155.

## ENDURANCE CUPS

DRIVEN

- Machined from 6061-T6 billet aluminum
- Designed to protect the front and rear axle nuts in case of a crash
- Vibrant anodized finish
- Sold as a set (one cup for front axle nut, one cup for rear axle nut)

GILLES

## ACM TITANIUM REAR AXLE NUTS

- Lightweight, 20 g TI6ALV4 titanium axle nut in a shapely design
- Innovative pin-interlock secure high-locking characteristics
- Perfectly complements the TCA Chain adjuster kits
- Plastic pin accommodates thread form and locks with friction
- Simple assembly with a customary hexagon nut
- Widths across flats depending on diameter of the axle nut (sw27-36)
- Sold each

**NOTE: All axle nuts are for rear axles only; unless noted in chart below.**

**SAFETY WARNING:** WHEN SELECTING CUSTOM WHEELS, THE TIRES USED FOR YOUR APPLICATION MUST HAVE A LOAD INDEX AND SPEED RATING EQUAL TO OR GREATER THAN THE TIRES FITTED AS ORIGINAL EQUIPMENT. CONSULT MANUFACTURER'S PUBLICATION(S) AND/OR WEBSITE(S) FOR COMPLETE TIRE INFORMATION.

**BOLD MAGENTA** part numbers are new for 2022

PB Pro-Bolt®

## TITANIUM FRONT/REAR FLANGED AXLE NUTS

- Manufactured from Grade 5 titanium
- Fit most models of bikes and/or swingarm axle nut
- Highly corrosion resistant and 40% lighter than original steel

## TITANIUM FRONT AXLE PINCH BOLT KITS

- High-tensile 6AL-4V (Grade 5) titanium
- Though these bolts are prone to corrosion, replacement bolts have high resistance to corrosion and are 40% lighter than original steel
- Can be torqued to manufacturer's original settings

K&L GENUINE

## VALVE STEM KIT REPLACEMENT PARTS

- Replacement parts sold separately

| DESCRIPTION | PART # |
|---|---|
| Valve cores (50-pk.) | 0360-0028 |
| Straight short 14 mm/16 mm dia. metal valve stems (6-pk.) | 0360-0030 |

K&L GENUINE

## VALVE STEMS

- Right-angle valve stem makes inflating tires on dual disc wheels easy
- Angled valve stem is a direct 90° bend from the surface of the wheel rim
- Ends the hassle of wrestling the air chuck between the brake discs
- Made of lightweight aluminum for less weight
- Short valve stem is for use on rear wheels
- For use on most tubeless tire rims
- Sold individually

## METAL VALVE STEM ASSEMBLY

- 30 mm (1,18") length
- Rubber O-ring seal
- Fits 8,3 mm (0,327") valve hole
- Made from high-quality materials for durability
- Sold as a 10-pack

| DESCRIPTION | PART # |
|---|---|
| Metal valve stem assembly | 0360-0047 |

PARTS UNLIMITED

## ANGLED VALVE STEM

- Great for ATVs and other tight applications
- Fits 10,9 mm (0,430") holes

| DESCRIPTION | PART # |
|---|---|
| Angled valve stem | MC-945 |

PARTS UNLIMITED

## METAL VALVE STEM

- Metal tubeless tire valve stem fits all cast wheels with 8,3 mm - 8,6 mm (0,327"-0,339") holes
- Full-length threading for various rim thicknesses
- Comes with metal cap, lock nut and O-ring seal
- 30 mm ($^{13}/_{16}$") effective length
- Replaces Schrader PART #6205

| DESCRIPTION | PART # |
|---|---|
| Metal valve stem | VS-1218R |

PARTS UNLIMITED

## TUBELESS VALVE STEM

- Features a precision-machined body, valve core and self-sealing hex cap
- For normal or heavy-duty use
- Anchor nut, thrust washer and rubber seal included
- Fits 12 mm to 15 mm (0,47" to 0,59") holes
- Lester™ mags and others may require a simple drill enlargement
- Sold each

| DESCRIPTION | PART # |
|---|---|
| Tubeless valve stem | 75-012 |

DRAG Specialties

## .38 SPECIAL VALVE STEM CAPS

- Styled to match .38 Special ammo
- Gold finish
- Sold in pairs

| DESCRIPTION | PART # |
|---|---|
| Valve stem caps | 0361-0048 |

## TAPERED VALVE STEM CAPS

GARDNER WESTCOTT

- Caps taper from 13 mm (1/2") on the top to 10 mm (3/8") on the bottom
- Polished chrome-plated finish
- Sold in pairs

| DESCRIPTION | PART # |
|---|---|
| Valve stem caps | 0361-0003 |

## ARMOR RIM STRIP TAPE

Motion Pro

- Ultra-tough and durable material protects tubes
- Won't shift or move like rubber rim strips
- Self-adhesive backed for easy no-mess installation
- Pre-cut hole for valve tube
- Protects inner tube like no other rim strip
- For 18", 19" or 21" wheels

| DESCRIPTION | PART # |
|---|---|
| 18"/19" wheels | 0360-0021 |

| DESCRIPTION | PART # |
|---|---|
| 21" wheels | 0360-0022 |

## STEEL WHEEL WEIGHTS

Motion Pro

- Adhesive-backed steel weights; lead free
- Weights stick securely to spoked or cast wheels
- Powdercoated or nickel-plated finish
- 3,5 g (0,125-oz.) weights feature a 10,2 mm x 13,1 mm vertical orientation for proper alignment when used in combination with Motion Pro's 7 g (0,25-oz.) weights
- 7 g (0,25-oz.) weights measure 12,7 mm x 19 mm

## BRAKE PADS AND SHOES

Aramid

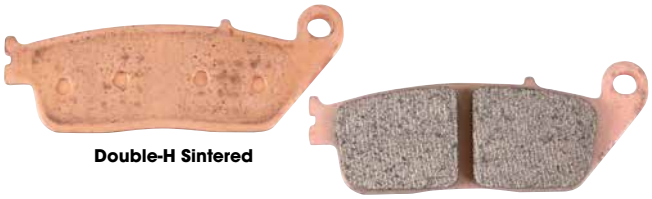
### ORGANIC/ARAMID BRAKE PADS

- Provide excellent stopping power without noise and rotor galling
- Fingertip control and strong, predictable brake response

Extreme Pro

### "EP" EXTREME PRO™ BRAKE PADS

- The latest in sintered metal brake pad fusion technology
- Pad blend includes molybdenum metal and tungsten additives to enhance friction performance for the life of the pad
- No lead, iron or steel additives; no more rotor outline etching or rotor stiction
- Super-fast bed-in, full friction after 10 to 15 race stop uses
- Great heat cycle ability; pads cool after the race and perform just as strong the next race day



### GPFA BRAKE PADS

- For racetrack use ONLY
- Extreme grip pad compound pads designed for use on race bikes with slick tires and the latest high-performance brake calipers
- Fade-free stopping power with fingertip control

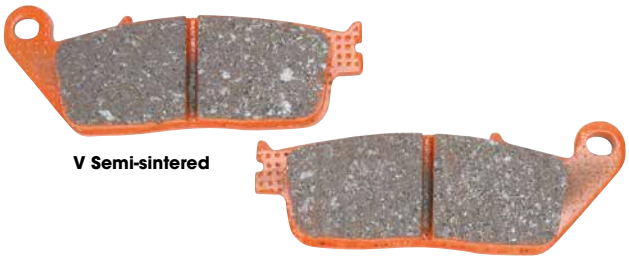
### GPFAX SINTERED ROAD RACE BRAKE PADS

- For racetrack use ONLY
- Provide even higher levels of grip compared to the GPFA pads
- Improved heat cycling – pads can be raced, allowed to cool and be re-used without a loss in brake performance
- New material wears better, causes less rotor/disc wear than previous materials – pads should be good for four or five races of 20 to 25 laps (depending on track lap length)
- For use on race bikes with slick tires and high-performance brake calipers
- Fade-free stopping power with fingertip control

**⚠ WARNING** **GPFAX pads are for Race/Track use only; not for street use. These pads are for Race/Track use only. Any other use could result in death or serious injury.**

Double-H Sintered

### DOUBLE-H™ SINTERED METAL BRAKE PADS



- Feature the HH friction rating – the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

### "TT" SPORT CARBON BRAKE PADS

- Carbon graphite pads blended with aramid fibers for leisure/sport use
- Low price point
- Lowest heat generation
- Best for fast, dry riding; not for mud, water or sand

### "R" LONG-LIFE SINTERED BRAKE PADS

- The perfect pads for leisure use
- Offer maximum durability and excellent braking performance
- Constructed of sintered bronze for longest lifetime
- Best for riding in water, mud, dust or sand

V Semi-sintered

### V SEMI-SINTERED BRAKE PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design combines the long life of a sintered pad with the great feel and lack of rotor damage common with sintered pads
- Can be used to replace aramid or sintered metal compound pads

### STANDARD/GROOVED BRAKE SHOES

- Made using high pressure die-cast aluminum platforms with bonded brake linings

**NOTE: PART #s listed in application chart are organic/aramid brake pads or standard brake shoes (unless noted). Brake shoes are standard unless noted in chart. See cross reference charts for all available brake pad types.**

**NOTE: ABE approved unless noted.**

**NOTE: Brake pads/shoes are sold in sets for one disc or one drum. For dual-disc applications, two sets of brake pads are required for complete replacement.**

## BRAKE PAD SHIMS

- Anti-squeal shim kits reduce brake pad vibration and noise while protecting the caliper piston
- Can be trimmed with scissors to required shape; apply these shims to the reverse side of the brake pads to prevent brake noise
- Sold in a 4-pk.

| DESCRIPTION | PART # |
|---|---|
| Brake pad shims (4-pk.) | **1702-0250** |

## DISC BRAKE PADS

### STANDARD BRAKE PADS

- Organic pad compound
- Long service life
- Suitable for use with all brake disc types
- Solid brake performance, even in wet conditions

Standard

### RQ BRAKE PADS

- Pads have an organic high-performance mix without general type approval
- Characterized by exceptionally good feedback and controllability even at high working temperatures
- In conjunction with their high friction coefficient and extremely low noise emission levels, RQ pads are ideally suited to use in motorsport, scooter racing, carting or carriage driving, indoor trials or in custom brake calipers made by different manufacturers

### SV SINTERED METAL BRAKE PADS

- For front brake use ONLY
- Completely metallic sinter pad
- Good performance
- Can be used with nearly any brake disc type
- Should only be used with bikes that were originally equipped with sintered metal brake pads
- Limited race track use; not heat resistant above 400 °C

SV

### CRQ HYPER-CARBON BRAKE PADS

- For front brake caliper use ONLY
- Carbon-based racing brake pad
- Greater durability than the SRQ pad
- Low-level pressure required, good friction rate
- Suitable for high-performance sport motorcycle use

CRQ

### SH SINTERED METAL BRAKE PADS

- For rear brake use ONLY
- Completely metallic sinter pad
- Good performance
- Can be used with nearly any brake disc type
- Should only be used with bikes that were originally equipped with sintered metal brake pads
- Friction rate is matched to the SV pad

SH

### TRQ TRACK RACING QUALITY BRAKE PADS

- Designed for maximum track performance while being street legal; enjoy a full day on the track and ride home on the same bike
- For front brake caliper use ONLY
- Higher, more stable friction coefficient for greater braking performance
- Optimized direct response characteristics
- Innovative sintering process for exceptional thermal resistance
- Low pad and disc wear

### SCR SINTER-CARBON BRAKE PADS

- Only for professional use
- Thermal adaptation required
- Long service life without hardening
- Preferred for extreme braking circuits or endurance races

**NOTE: ABE approved unless noted.**

**NOTE: All brake pad application PART #s shown are STANDARD compound pads unless noted in chart.**

**NOTE: Some brake pad applications are available in multiple compound types. To see if additional brake pad compound type is available for your application, check your brake pad PART # in the cross-reference charts provided.**

**⚠ WARNING** **SCR/CRQ pads are for Race/Track only; not for street use. These pads are for Race/Track use only. Any other use could result in death or serious injury.**

### SRT SINTERED ROAD/TRACK PADS

- Premium compound pad with state-of-the-art technology for high durability, performance and ideal modulation (feel)
- Completely metallic sinter pad compound
- Provide stable non-fade performance; excellent choice for track days or club racing
- Compatible with nearly all brake disc types

### EC ORGANIC BRAKE PADS

- Compound for offroad, scooters and low-power vehicles
- Very attractive pricing
- Optimum performance after bedding-in period
- High durability under dry conditions

### PC ORGANIC CUSTOM PADS

- Organic carbon mixture
- High braking performance
- Special mixture with low braking noise maximizes the comfort
- Compatible also with brake discs of stainless steel, die-cast, chrome-plated or polished steel
- Reduced brake dust
- Especially for custom and older sport bikes

## BRAKE PAD SHIMS

- Reduce brake pad vibration and noise and protect the caliper piston
- Self-adhesive rubber/fiberglass shims can be trimmed (if necessary) to fit any caliper/pad combination
- Sold in a package of four

| DESCRIPTION | PART # |

BOLD MAGENTA part numbers are new for 2022

## ROAD BRAKE PADS

- Developed to give you the most performance and longest life from your brake system
- Available in sinter and racing dual carbon compounds
- Perfectly match Moto-Master brake discs

### FRONT PADS SINTER COMPOUND

- For new generation high-performance sport, touring and custom motorcycles
- Offers fade-free brake performance, great brake feel and thermal stability
- Developed for sport riding and high loads from heavy motorcycles
- ABE and ECE-R90 approved

### REAR PADS SINTER COMPOUND

- For new generation high-performance sport, touring and custom motorcycles
- Provides necessary and expected brake performance in combination with Moto-Master's sinter compound front pad
- ABE and ECE-R90 approved

### FRONT AND REAR PADS CERAMIC COMPOUND

- For earlier generation sport, touring and custom motorcycles
- Equipped with NRS technology, which provides a constant pressure point all through the brake pad lifestyle
- ECE-R90 approved

### RACING FRONT PADS DUAL CARBON COMPOUND

- Race-proven, carbon-based compound for Superstock, Supersport and Superbike racing at the World Championship level
- Equipped with NRS technology, which provides a constant pressure point all through the brake pad lifestyle

**⚠ WARNING** **Dual Carbon pads are for Race/Track use only; not for street use. These pads are for Race/Track use only. Any other use could result in death or serious injury.**

### PARKING BRAKE PADS CERAMIC COMPOUND

- Offers stable brake performance under a wide variety of conditions
- Long lifespan and disc-friendly construction
- Equipped with NRS technology, which provides a constant pressure point all through the brake pad lifestyle
- ECE-R90 approved

## GALFER BRAKE PADS

### SEMI-METALLIC (1050/1054)

- Great feel and modulation for OEM brake pad replacement
- Long-lasting brake pad and very little rotor wear
- Good in wet and/or dry conditions
- Overall a very versatile brake pad compound for almost every need
- GG Rated

### SINTERED METAL STREET COMPOUND (1370/1371)

- For moderately aggressive everyday or sport street riding
- Advanced ceramic composites ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- HH friction-rated compounds deliver excellent feel and modulation
- Great heat recovery and easy on rotor discs
- Developed for aggressive street riding and sport touring, great choice for heavier street bikes

### SINTERED SPORT COMPOUND (1375)

- For moderately aggressive everyday and sport street riding
- Ceramic-coated backing plate to assist with temperature management and dissipate heat
- Advanced ceramic composites ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- HH friction-rated compounds deliver excellent feel and modulation
- Capable of handling almost any type of riding you throw at them
- Brake pads do not fade
- Performance street, track days, canyon riding, amateur racing

### SINTERED RACING COMPOUND (1375R)

- Designed for the quick temperature changes of Superbike racing from corner to corner
- Fast recovery from long and heavy brake applications in race conditions
- Strong, consistent feel and modulation during the race
- Easy on rotors, no excessive material build up or rotor wear
- HH rated compound with ceramic and carbon sintered fibers
- Race use only, not suitable for street or recreational use
- Tested and used by Moto GP and MotoAmerica athletes

### SINTERED COMPMOUND (1380)

- Strong, progressive braking power
- Withstands high temperatures and repeated hard use without fade
- Suitable for all weather conditions

**NOTE: PART #s listed in the application chart are Semi-Metallic (G1050 or G1054) compounds (unless noted). See cross-reference chart for all available brake pad compound types.**

## DP BRAKES

### THE ORIGINAL SINTERED METAL BRAKES

- DP Brakes brake pads are designed with sintered metal compounds to give your bike high-tech performance in all conditions
- Pads have a quick break-in period so you get maximum performance fast
- DP Brakes design and materials ensure consistent hard stops and fade-free performance
- Sintered metal compounds outlast more conventional organic or aramid pads

### STANDARD SINTERED METAL BRAKE PADS

- GG friction rated and made with DP Brakes' proven sintered metal material
- Gray-colored aluminum oxide-based ceramic material on rear of backing plate keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Pad compound gives equal performance in wet or dry conditions
- Ideal replacement for street and touring machines where durability is the prime requirement
- No brake fade

### SPORT HH+ SUPERSPORT PADS

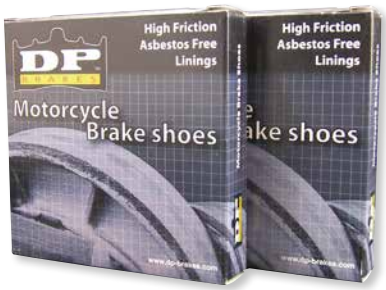
- Powerful, industry-high HH+ friction rating with no mileage penalty
- High-tech ceramic heat shield eliminates brake fade
- Dust-free compound design
- Quick break-in so you get maximum braking ability fast
- For front wheel use only

### RDP RACE PADS/X-RACE TITANIUM PADS

- Developed with the aid of top works teams to perform at the World Superbike level, where an HH friction rating is required
- Gray colored, state-of-the-art zirconium-based ceramic material on rear of backing plate works as heat shield in high-stress conditions to keep heat away from caliper piston and fluid
- Quick one-lap break-in
- Fade free even in the harshest conditions
- For track use only
- Race Pad PART #s begin with an (R) designation and are available in a limited number of fitments

### PRO MX HIGH-PERFORMANCE BRAKE PADS

- Developed by Pro Factory riders for MX, enduro, hare scrambles, supercross and off-road use where performance is the prime requirement
- High-performance HH-rated friction material
- Equally adept in wet or dry conditions
- No brake fade
- Excellent initial response and quick break-in
- Gray colored, state-of-the-art zirconium-based ceramic material on backplate works as a heat shield in maximum-stress race conditions
- DP PRO MX pads are available in a limited number of fitments
- MX Sport recommended for all motocross racing and competitive enduro use



### ODP ORGANIC BRAKE PADS

- Low cost, quality brake pads
- Suitable for all-around use on all types
- For high-performance applications DP Brakes recommends standard sintered metal DP Brakes pads

### BRAKE SHOES GF FRICTION RATED

- Asbestos-free shoes from DP Brakes
- Excellent overall performance and lasting durability

**NOTE: ABE approved unless noted.**

**NOTE: PART #s listed in application chart are standard brake pads or standard brake shoes (unless noted). To see if additional brake pad compound type is available for your application, check your brake pad PART # in the cross-reference charts provided.**

## BRAKE CALIPER KIT W/ BRAKE PADS

- 4-piston racing caliper with brake pads
- Made from aircraft-grade billet aluminum
- Oversized racing compound brake pads provide excellent stopping power
- Capable of withstanding immense amounts of physical and thermal stress
- All caliper kits include caliper, billet adapter bracket, racing compound pads and necessary mounting hardware; caliper with a black anodized finish is available separately
- For use with Supermoto front racing rotors, sold separately on pages 1457-1461

| DESCRIPTION | PART # |
|---|---|
| 4-piston brake caliper with pads | 1701-0592 |

### ADAPTERS AND REPLACEMENT PARTS

| DESCRIPTION | PART # |
|---|---|
| **ADAPTERS** | |
| 300 mm | **1704-0500** |
| 320 mm | **1704-0493** |
| 320 mm | **1704-0501**[1] |

| DESCRIPTION | PART # |
|---|---|
| **REPLACEMENT PARTS** | |
| Caliper piston seal rings (4-pk.) | **1702-0440** |
| Caliper bleeder nipple and dust cap | **1702-0441** |

[1] Use only in combination with 16" or 17" wheels.

## BRAKE PAD PINS

• OE-replacement brake pad pins made of high-quality stainless steel

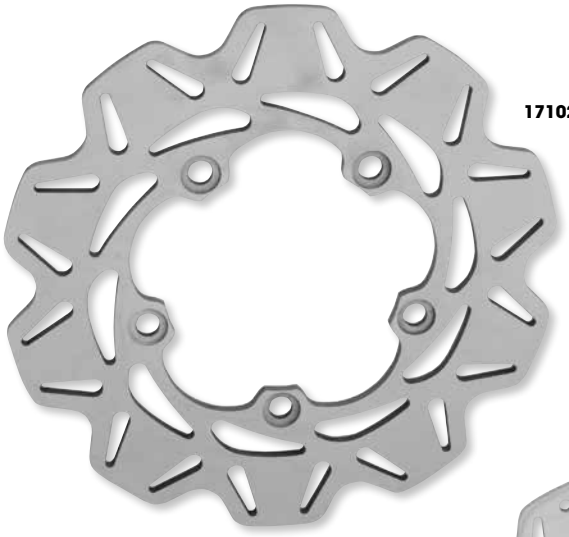
EBC BRAKES

## PRO-LITE MD STANDARD BRAKE ROTORS WITH ABE

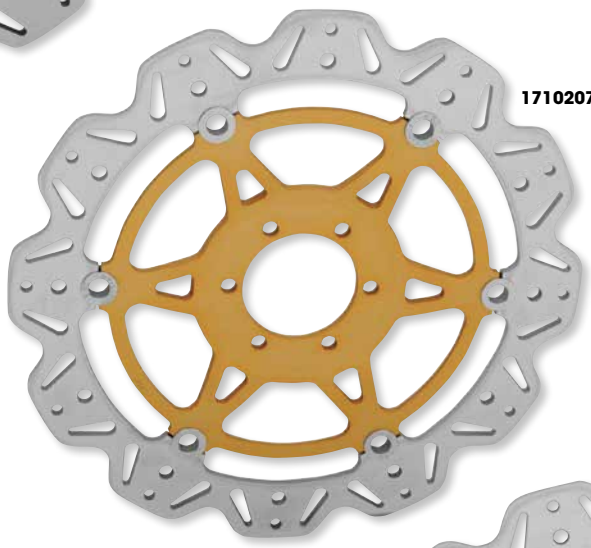
- Complete bolt-on and go rotor assemblies
- Made with forged aluminum center hubs, high-friction billet steel rotor rings and sturdy riveted construction
- X-Series rotors offer a universal design for left- or right-side applications; all X-Series feature SD-System™ square-sided buttons that allow the rotor to expand inwards and outwards unrestrained for perfect rotor functionality at any speed or load and increased durability
- Excellent choice when upgrading or replacing OEM brake rotors
- Sold each

**NOTE: ABE approved unless noted.**



**NOTE: For brake rotor applications, see pages 1386-1419.**

## PRO-LITE EXTREME (X, XC) BRAKE ROTORS WITH ABE



- XC Rotors feature a floating brake disc with a radical contour design for a lightweight profile
- X Rotors feature a floating brake disc with a full-circle rotor ring
- Brake disc design reduces weight and increases brake effect
- Brake disc center hubs are forged aluminum
- Rotor construction uses high-friction billet steel
- Universal left- or right-side application
- X-Series rotors feature the SD-System™ of square-sided buttons that allow the rotor to expand inwards and outwards unrestrained for perfect rotor functionality at any speed or load and increased durability
- Sold each

**NOTE: ABE approved unless noted.**

**NOTE: For brake rotor applications, see pages 1386-1419.**

**17102000**

**17102077**

**17101915**

## VEE-ROTORS™

### FRONT ROTORS

- Fully floating rotor design
- Stainless steel rotor blades that are heat-treated and tempered back to the optimal hardness for maximum performance and durability
- Lightweight rotor profile design
- SD-System™ square drive button technology – rotor and carrier are riveted together so there is no need to ever rebuild the carrier buttons
- Vee-Rotors have black rotor hubs
- Front rotors are non-directional: fit right or left side
- Sold each

### REAR ROTORS

- Matching design for front rotors
- Stainless steel rotor blades that are heat-treated and tempered back to the optimal hardness for maximum performance and durability
- Lightweight rotor profile design
- Sold each

**NOTE: For brake rotor applications, see pages 1386-1419.**

**NOTE: ABE approved unless noted.**

[1] Not ABE approved.
[2] X-Series floating rotor.
[3] Rotor ring only.
[4] Floating rotor.
[7] Solid rotor.
[8] Requires two rotors for dual-disc applications.

**BOLD MAGENTA** part numbers are new for 2022

1 Not ABE approved.
2 X-Series floating rotor.
4 Floating rotor.
7 Solid rotor.
8 Requires two rotors for dual-disc applications.

**BOLD MAGENTA** part numbers are new for 2022

EBC BRAKES ABE See chart for details

[1] Not ABE approved.
[2] X-Series floating rotor.
[3] Rotor ring only.
[4] Floating rotor.
[8] Requires two rotors for dual-disc applications.
