## SENTINEL PRO CHEST PROTECTOR SIZING

No single size protector can fit all body sizes and types. The sizing system of back protectors is based on the user's waist to shoulder length (measured on the back from the waist line to the junction of the shoulder and the neck at the highest point) as no consistent relationship to the body height exists. The sizing system for this complete Sentinel Pro integrated impact protector combination is based on the chest girth and waist to shoulder length together. These dimensions are measured on the body with a tape measure. In order to ensure you choose the correct size of this Sentinel Pro, please see the table below\*:

SIZE	XS/S	M/L	XL/2XL
CHEST GIRTH (IN)	29.5" - 33.5"	33.5" - 37.4"	37.4" - 41.3"
