AIR SEAT CUSHIONS

- Eliminate painful pressure points and promote blood circulation by utilizing adjustable interconnected air cells which conform to the rider's shape regardless of weight or seating position
- Reduce shock and vibration to reduce lower back pain; improve air circulation under the rider to disperse heat and perspiration
- Add shock absorption to provide greater overall seat comfort
- Three size options: Smart, Sport and Pillion
- Smart (39,5 cm W x 86 cm L x 51 mm H (15,5" x 34" x 2")) is a universal fit for most large cruisers, standards, sports touring and adventure touring models; special features include a wide front-to-back cutout to reduce contact with the scrotum, prostate and tailbone; tapered front and back air cells provide optimal fit for elevated front and back seat contours and also improve leg passage
- Sport (32 cm W x 32 cm L x 51 mm H (12,5" x 12,5" x 2")) was designed with a 15 cm (6") front to match the narrow seat profile of most dual sport, adventure touring, sport touring and other non-touring models; special features include a narrow front with tapered cells to reduce contact with the scrotum and provide easy leg passage; back cutout area reduces contact with tailbone
- Pillion (23 cm W x 29 cm L x 51 mm H (9" x 11,5" x 2")) is a universal fit for passengers on almost all motorcycles; may also be used by the rider on very short or narrow saddles; special features allow the passenger or rider to use the Pillion lengthways or sideways
- Three cushioning options: Classic, Air Gel and Lite
- Classic cushions are made with medical-grade neoprene rubber for the ultimate in comfort, elasticity and natural "butt feel" in a motorcycle seat cushion
- Air Gel features three layers of polyurethane with gel pads inserted inside each individual air cell to provide additional cushioning, shock absorption and vibration dampening; can also be used without air when the rider wishes to feel 100% "close to the bike" yet needs some additional cushioning
- Lite is made of economical, lightweight polyurethane and reduces painful pressure points, promotes blood circulation, reduces heat and moisture buildup and lowers shock and vibration better than any other low-cost comfort product

REV2 THROTTLE KIT FOR SUZUKI SFV650 09-17/SV650 17-19

- The most advanced variable-rate throttle in the world
- Innovative reel changing system lets you tailor the throttle rate to riding conditions and rider preference
- Ultra-compact housing with snap-together elbows make it easy to install and change reels
- New sleek design requires less handlebar space for lever clearance and throttle position
- Use smaller reels for slower throttle rate and larger reels for faster throttle rate
- Included cam reel provides progressive throttle response preferred by some riders
- Unique reel design allows fast reel changes
- Cable boot keeps dirt and dust out for reliable and smooth operation
- Billet aluminum inline cable adjusters for easy installation and adjustment
- Lower section of cables use 5 mm housing with PTFE liner for reduced friction, increased routing flexibility and lighter weight
- Upper section of cables use 6 mm housing to provide solid support of adjusters
- Simple to install and maintain
- Kit includes Rev2 throttle assembly with throttle tube, Motion Pro Revolver black vinyl cables, Motion Pro RoadControl grips and Rev2 Street cam reel
- Standard interchangeable reels 35 mm, 40 mm, 45 mm, 50 mm are also included
- Designed by Motion Pro
- Patent pending

WARNING: Rev2 Kits have cables specifically designed for fitment on specific models, but the Rev2 throttle itself is not model specific. Therefore, in some situations, the Rev2 kit may not be a direct bolt-on installation due to space limitations on the stock handlebar. In some installations, it may be necessary to move other control components on the stock handlebar, shorten the Rev2 throttle tube and grip, install longer aftermarket handlebars or possibly all of the above. It is up to the end user to determine the best method for fitment on their motorcycle, and ensure that the Rev2 kit is installed properly and with the correct clearances for safe operation. Installation should be done by a qualified mechanic and carefully checked for proper function. Improper installation could result in great bodily injury or death.

Rev2 throttle kit	0632-0846

THROTTLE SLEEVES FOR KAWASAKI

- Replaces OEM throttle sleeves
- Heavier duty and exceeds the quality and durability of OEM sleeves
- Will not scar bars like aluminum sleeves
- Nylon fabric composite material
- Fixed end cap
- Molded ridges to help secure grips
- One-piece tube and reel design

VFORCE4
 BY MOTO TASSINARI

VFORCE4 REED VALVES AND REPLACEMENT REEDS

- Advanced reed petal resin system, carbon fiber and lay-up
- Pre-curved reed petal ensures better seal at the tip
- Wider reed cage for maximum airflow
- Combined reed tip area is increased by 10,5% for better airflow
- Airfoil shape added to cage tip to increase velocity from the outer ports
- Long reed stops added to progressively slow reed petal tip velocity for increased petal durability
- Reduced frontal area of the central wing combined with a more aerodynamic shape
- Replacement reeds sold one set per reed cage, PART #1008-0315 sold separately
