TRASK PERFORMANCE

The mission and vision of Trask Performance is simple: produce reliable, high-quality products made in the U.S.A. that make big horsepower! Trask is one of the top tuning shops in the country and a leader in performance products for American V-Twin motorcycles. Innovative chain drive conversion kits, high-performance exhaust and custom engine covers are just a few of the amazing products Trask has available to help you create the custom bike of your dreams.

ASSAULT DERBY COVERS

- Billet machined 6061-T6 aluminum construction
- Acrylic see-through window
- Matches the Trask Assault series air cleaners and cam covers

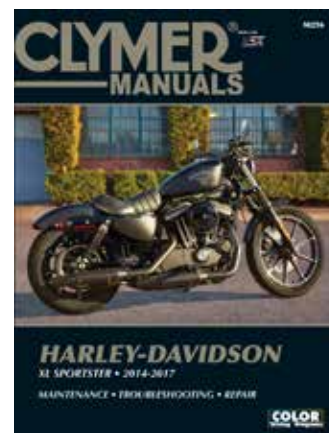

PART #	DESCRIPTION
FOR 16-20 DRESSERS, 14-15 FLHTCUL/FLHTKL	
1107-0637	Gloss black
1107-0638	Chrome
1107-0639	Raw
FOR 99-18 BIG TWIN (EXCEPT 18 FLSB, 16-18 DRESSER, 14-15 FLHTCUL/FLHTKL)	
1107-0640	Gloss black
1107-0641	Chrome
1107-0642	Raw

FORCEFLOW CYLINDER HEAD COOLERS

- Smooth, streamlined design that will keep your Softail running cooler; consistently reduces operating temperatures up to 38 °C (100 °F)
- High-tech, waterproof cooling fan pushes air around cylinders and cylinder heads
- Cooling fan can be controlled manually or can be regulated by a thermostat that monitors head temperature and activates the fan when engine temperature rises
- Built-in quality OEM-type replacement horn included
- Easy plug-and-play installation with no drilling
- Includes Forceflow assembly with high-powered fan, horn, thermostat, coil relocation kit with plug wires, hardware and detailed instructions

PART #	DESCRIPTION
FOR 18-20 SOFTAIL MODELS	
1901-0804	Black
1901-0805	Chrome

CLYMER

MOTORCYCLE REPAIR MANUALS

- Whether it's simple maintenance or complete restoration, don't start work without Clymer, the leader in service manuals
- Save yourself time and frustration with these procedures and techniques used by the professionals
- Comprehensive manuals contain exploded views, drawings, specifications and charts that illustrate each job
- Feature shortcut repairs and high-performance modifications

PART #	DESCRIPTION
4201-0352	For 14-17 XL models

BA DETACHABLE WRAP-AROUND RACKS

- Designed for use with OEM seats or some aftermarket seats
- Measure approximately 33 cm (13") from front to back and 48,5 cm W (19")
- Aftermarket models are 43 cm W (17")
- Include all mounting hardware
- Available in chrome or black

1741-5858

DESIGNER SERIES DOT ABS-SPECIFIC FRONT BRAKE LINE KITS

- Manufactured with an enhanced construction designed to be compatible with Harley-Davidson® ABS requirements for stock and alternate length brake lines
- Mid-line brake lines work in conjunction with the Designer Series upper brake lines to complete the connection from the ABS controller up to the master cylinder (both the ABS Mid-Line brake line and the Upper Designer brake line are required; see the 2020 Parts Europe FatBook for the upper brake lines)
- Lower brake lines are manufactured specifically for dual disc 18-20 Softail FXFB, FXFBS, 20 FXLRS and 16-20 XL1200CX Roadster models with ABS
- Lower brake lines must be used with an upper brake line that is sold separately; see the 2020 Parts Europe FatBook for the Upper brake lines
- -3AN connections make for easy installations
- All fittings are highly polished and chrome or black chrome plated

NOTES: Magnum Shielding brake lines are designed to follow the same routing path as OEM lines.

If replacing the stock lower brake line assembly on 2018+ dual disc Softails, an adapter is **NOT** needed. Using -3AN fittings, the upper line connects directly to the Magnum lower assembly.

Non-stock applications require taking a measurement angle to for upper brake line length and banjo ensure correct fitment (see How to Order)

Harley-Davidson motorcycles equipped with ABS (anti-lock brake system) require ABS specific upper and lower brake line kits. Failure to do so may result in compromised anti-lock braking ability. Magnum Shielding upper brake line kits manufactured specifically for these applications are identified with the letters "ABS" printed directly on the brake hose.

- The Industry's highest quality braid in two color choices to complement your bike: Sterling Chromite® II or Black Pearl
 - Braid color and weave match all Magnum control cables and brake lines
 - Crystal clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
 - Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket to provide the ultimate in high performance by greatly reducing line expansion
- DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

IMPORTANT – HOW TO ORDER:

Stock fitments: The stock fitment chart determines the upper, lower and mid-line kits needed for your application. Lower and mid lines are model specific. Stock upper line length and banjo angle is listed for each application to help when choosing alternative length upper lines.

Alternative fitments: Due to handlebar changes, fitment options are accommodated with the **UPPER** line only. See the alternative length chart for available lengths and banjo angles.

2018+ Softail Dual Disc Upper Lines. The upper line connects directly to the Magnum Designer dual disc lower brake line. Measure from the stock lower line manifold to the master cylinder. This will be your line length

Upper line length for Trike models is measured using the 49" mid-line as a reference to determine additional line length needed to complete the routing from the ABS controller to the master cylinder. That measurement will be your upper line length. (see diagrams below).

XR STAINLESS EXTREME RESPONSE FRONT DOT BRAKELINE KITS

- Manufactured with an enhanced construction for extreme braking response and durability
- Designed to be compatible with Harley-Davidson® ABS requirements for stock and alternate length brake lines
- Two color choices: Clear-coated with chrome fittings or black-coated stainless steel with black chrome fittings
- Available in stock and plus lengths to fit most 18+ Softail ABS Harley-Davidson models
- All fittings are highly polished and chrome or black chrome plated
- Inner PTFE tubing braided with XR Stainless Steel reinforcement embedded in a tough Nylon outer jacket offers exceptional protection for paint or chrome
- All brazed manifold construction eliminates leaks, alignment problems, and unattractive threaded connections for a sleek appearance
- -3AN connections for easy installations

NOTE: Complete kits contain brake line assemblies to connect the calipers to the master cylinder.

ABS Upper Kits contain a brake line assembly with needed adapters to connect the lower brake line assembly to the master cylinder. A lower brake line assembly is not required.

ARLEN NESS

Three generations of this family lend their expertise to custom bike-building parts and accessories. Ness is not only one of the most recognizable names in custom but has a well-earned reputation for providing innovative, high-quality products for passionate motorcycle enthusiasts that is unmatched within the industry. The latest design footpegs, floorboards and points covers continue to showcase the amazing design and engineering talent that has kept Arlen Ness products in the custom scene spotlight.

MX DRIVER AND PASSENGER FLOORBOARDS

- Lightweight, cut-through design with integrated rubber inserts for excellent foot traction
- CNC-machined from billet aluminum with machined cuts on both the top and side of the floorboard for added style at every angle
- Rubber inserts offer foot traction and protect the finish of the aluminum floorboard (inserts are replaceable)
- Extended length for added foot room and comfort
- Passenger boards available (sold separately)
- Driver Floorboards: 18" L x 5,75" W x 1" T
- Passenger floorboards: 7" L x 4" W x 1" T
- Sold in pairs
- Matching MX footpegs are available separately

NOTE: Models w/ passenger footpegs will require the use of OEM accessory floorboard mounts.
