

Product News

VELOCITY 90° AIR CLEANER KITS

- Forward facing 90° Velocity series intake
- Aggressive short length intake tube engineered to significantly increase airflow without sacrificing legroom
- Hidden breathers are O-ringed at the heads and exit at the mouth of the throttle body/carb to provide efficient engine breathing in a virtually closed loop system, eliminating the need for any external hoses or hardware
- Velocity style performance filter features a built-in inverted top to pull in air not only from the sides of the filter but also the front, for more performance gaining airflow
- Synthetic filter element is water-resistant and washable/re-useable; for extreme weather situations rain socks are available (sold separately)
- M-Eight applications include throttle servo cover
- Designed to work with factory lowers

1010-2716

DESIGNER SERIES DOT EXTENDED ABS TOURING LOWER BRAKE LINE KITS

- Lower brake line kits available in extended length versions to fit 2014 and up Harley-Davidson Touring Models with ABS
- Allows brake calipers to be moved to different mounting locations, including radial brake caliper relocations
- Caliper lines are extended and incorporate EZ-Align banjos for easy installation
- Plus 50,8 mm (2") or plus 102 mm (4") length stock style, two-line configurations
- Left side dual to single disc conversions in stock, plus 50,8 mm (2") or plus 102 mm (4") lengths
- CNC precision bent tubes for a factory fit
- Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® Aramid Fiber, premium Signature Magnum braids and a crystal-clear outer PVC jacket that will never discolor
- Aramid Fiber reinforcement greatly reduces line expansion for the ultimate in high performance
- The industry's highest quality braid in two Signature color choices; Sterling Chromite® and Black Pearl

- Matching upper brake lines on pages, hydraulic clutch lines and clutch cables are available to complement the lower brake lines; see page 7
- Highly polished fittings are chrome or black chrome-plated

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

NOTE: Magnum Shielding brake lines are designed to follow the same routing path as OEM lines.

NOTE: Harley-Davidson motorcycles equipped with ABS (anti-lock brake system) require ABS specific upper and lower brake line kits. Failure to do so may result in compromised anti-lock braking ability. Magnum Shielding brake line kits manufactured specifically for these applications are identified with the letters "ABS" printed directly on the brake hose.

BLACK PEARL STERLING CHROMITE

DESIGNER SERIES DOT ABS-SPECIFIC UPPER FRONT BRAKE LINES

- Manufactured with an enhanced construction designed to be compatible with Harley-Davidson® ABS requirements for alternate length brake lines
- 35° upper brake line banjo angles ensure a great fit
- AN-3 connections make for easy installations
- All fittings are highly polished and chrome or black chrome-plated
- The Industry's highest quality braid available in two color choices to complement your bike: Sterling Chromite® or Black Pearl
- Braid color and weave match all Magnum control cables and brake lines
- Crystal-clear PVC outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Inner PTFE tubing braided with Aramid Fiber reinforcement provides the ultimate in high performance by greatly reducing line expansion
- Must be used in conjunction with the Designer Series lower brake line kits (sold separately)

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

NOTES: Magnum Shielding brake lines are designed to follow the same routing path as OE.

Upper brake lines will require the use of adapters (sold separately) to install. Use PART #1742-0658 for 18-21 models or PART #1742-0458 for 12-17 models (see the 2021 Part Europe Drag Specialties FatBook).

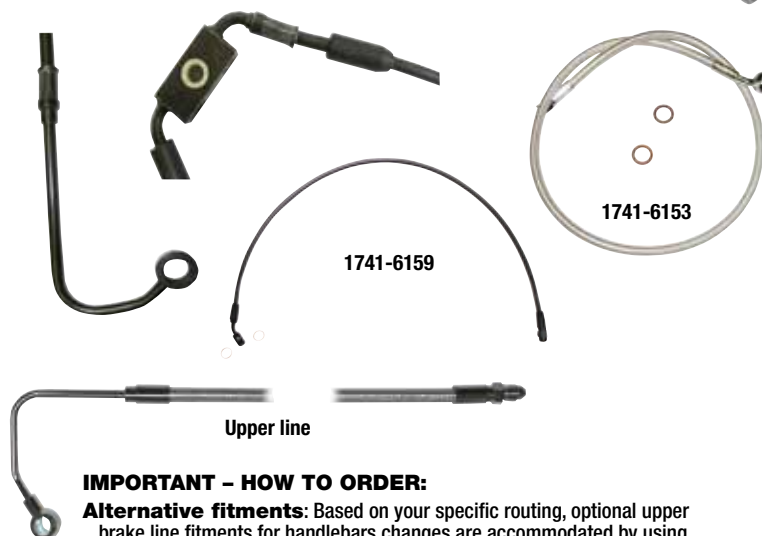

Non-stock applications require taking a measurement for upper brake line length and banjo angle to ensure correct fitment (see How to Order).

Harley-Davidson® motorcycles equipped with ABS (anti-lock brake system) require ABS specific upper and lower brake line kits. Failure to do so may result in compromised anti-lock braking ability. Magnum Shielding upper brake line kits manufactured specifically for these applications are identified with the letters "ABS" printed directly on the brake hose.

Sterling Chromite II

Black Pearl

1741-6159

Upper line

IMPORTANT - HOW TO ORDER:

Alternative fitments: Based on your specific routing, optional upper brake line fitments for handlebars changes are accommodated by using the alternate length chart for available lengths and banjo angles.

Upper line length is determined using the stock master cylinder line as a guide.

11-17 Softail: Adapter required.

18+ Softail: Adapter required.
